<https://archive.org/details/39101909080021>

Preface

This publication is a directory to data sources in Statistics Canada which are not listed in the agency's annual catalogue of publications. As a companion volume to the catalogue, its purpose is to augment the information already available about Statistics Canada's products and services and how they may be accessed. The many references in the directory to data available on magnetic tape or by direct access to CANSIM, the agency's on-line data retrieval system, reflect the agency's continuing interest in meeting the needs of users for statistical information in machine-readable form.

The information presented in the directory has been obtained from staff within the data-producing divisions of Statistics Canada. Without their assistance the directory could not have been produced. The publication was planned and produced by Norman H. Hodge of the Business, Provincial and Municipal Relations Division. Liaison work and initial organization of material were carried out by Gloria Royce; manuscript preparation and subject index by Amelia Gomez.

Table of Contents

Introduction	1		
Data Files	1		
CANSIM	3		
Other Guides and Indexes	3		
Statistics Canada Advisory Services	4		
Data Files	7		
1. General	7	7. Employment, Unemployment and Labour Income	57
13 Comprehensive Studies	7	71 Labour Force	57
14 Productivity Studies	12	72 Employment and Earnings	61
15 Input-Output Tables	13	73 Unemployment Insurance	63
2. Primary Industries	15	74 Employee Benefit Plans	63
21 Farm Income, Values and General Production	15	8. Education, Culture, Health and Welfare	65
22 Farm Crops	18	81 Education	65
23 Farm Livestock and Animal Products	21	82 Public Health	71
3. and 4. Manufacturing	25	83 Hospitals and Health Manpower	75
31 General Surveys	25	84 Vital Statistics	77
32 Foods, Beverages and Tobacco	29	86 Welfare Statistics	78
45 Petroleum and Coal Products	30	87 Culture Statistics	78
5. Transportation, Communications and Utilities	31	88 Science and Technology	85
51 Air Transport	31	9. Census	89
53 Road Transport	32	91 Population Estimates and Projections	89
54 Water Transport	35	92 Population	98
56 Communications	36	96 Agriculture	102
57 Other Utilities	37	Appendix to Chapter 9	104
6. Commerce, Construction, Finance and Prices	39	Index	107
61 Business Conditions	39		
62 Prices and Consumer Expenditure	43		
63 Merchandising and Services	46		
64 Construction and Housing	48		
65 External Trade	52		
66 International Travel	53		
68 Government Finance	54		

Introduction

As indicated in the preface, this publication is a directory to data sources in Statistics Canada which are not described in the annual catalogue of publications. The information was supplied by project managers in the various operating divisions throughout the agency. Compilation therefore required dialogue with a large number of individuals, each following procedures in the handling and organization of data files best suited to their particular operation. As a result, the file descriptions included in the directory may vary somewhat in consistency of content and presentation. However, users of the book should find the descriptive material adequate as a first step in the identification of data related to their needs.

The directory is in two parts. The first part consists of the file descriptions arranged by subject with each file identified by title and by a unique index reference code. The second part is an index to the main subjects covered in the file descriptions.

Data Files

For the convenience of users, the directory is patterned on the *Statistics Canada Catalogue* in its subject structure. Chapter headings and subheadings are identical to those in the catalogue and are in the same order in the two publications, permitting the user to move easily from one to the other and to identify the full range of data available on a particular subject.

In similar fashion the first two digits of the index reference code match the first two digits of the catalogue number and are linked to the chapter headings (first digit) and subheadings (first and second digits). The Table of Contents provides a key to chapter headings and subheadings.

Three basic types of file are described in the directory: **microdata**, **off-the-shelf tabulations** and **special request tabulations**. Microdata files consist of unaggregated records of individual responses to bureau surveys, which have been carefully screened to ensure complete confidentiality (i.e. all records are non-identifiable). Selected data sets in this form have been pre-planned

and assembled on magnetic tape. These tapes, along with necessary documentation, permit the creation of tabulations on users' own computer systems.

"Off-the-shelf" tabulations are pre-planned in anticipation of demand for particular summary type data. The scope and detail of tabulations available in this form vary widely.

"Special request" tabulations are generated in response to specified requirements of individual users and usually involve some computer programming to produce them. As user-defined and not pre-planned, such tabulations from Statistics Canada databases offer an important source of information tailored to the needs of users.

The file descriptions contained in the directory are in the form of information profiles, each consisting of a title and up to 12 profile headings. Each heading provides information on an important aspect of the file. Although not detailed, the profile information is designed to permit a prospective client to decide if information from a particular file is likely to meet his or her need. However, before ordering, it is advised that the address or telephone number provided under the heading, "Contact" be used to obtain information on cost and availability as well as quality, confidentiality, delivery dates, or other conditions or restrictions which may apply to a specific data set. Charges for "special request" tabulations will generally be related to the volume and/or complexity of a particular request and will cover the costs of providing the service. Prices for other tabulations may be obtained on inquiry.

Title and Type

The products and services described in the directory begin with a title appearing in boldface at the top of each entry. One or more of the designations, "Microdata", "Off-the-shelf tabulations", or "Special request tabulations", appear just to the right of each title.

Source

Information under this heading generally indicates the origin of the data, i.e. where and how they were

obtained. Most often, data files originate from surveys conducted by Statistics Canada. Data collected for administrative purposes by other federal or provincial government departments are also frequent sources. Surveys carried out on a sample basis are so indicated.

Universe

The universe specifies the units (households, manufacturing establishments, individuals, institutions, etc.) to which the collected data relate. It usually includes a statement of the scope and/or limitations of the geographic coverage of the data bases.

Subject Content

This is a brief description of the most important variables (characteristics, attributes, activities, etc.) included in the file. No attempt has been made to list all the variables in full detail.

Geographic Coverage

The level of geographic detail available from a file is indicated here. For definitions of Statistics Canada standard geographic units, users are referred to the *1981 Census Dictionary* (Cat. No. 97–901) or the *Standard Geographical Classification, 1981*, Vols. I and II (Cat. No. 12–568). For definitions of “region” (of Canada) and “economic region” (recently designated “subprovincial region”) see the *Dictionary of the 1971 Census Terms* (Cat. No. 12–540). If data can be compiled according to user-specified areas this is indicated.

Additional Information

Information provided under this heading is an extension of subject content and usually indicates in what respect the data differ from that contained in publications.

Frequency and Time Span

This heading indicates the periodicity of the data, i.e. monthly, quarterly, annual, occasional, etc. and the time period covered (e.g. monthly, from 1975).

Size of File

An attempt is made here to give the prospective client some rough indication of what may be available from the file. The measures of quantity presented are: for microdata, the number of respondent records in the files; for off-the-shelf tabulations, the number of tabulations; for user-defined tabulations, the approximate number of variables.

Massaging of Data

This heading refers to additional services available from a number of the contacts listed in the directory in the form of special manipulations such as: calculation of percentages, averages, median, etc.; regression analysis and logarithmic or other transformations; model simulations or solutions. If manipulations of the data are available a general statement to that effect is included

under this heading. Massaging is not offered with microdata.

Mode of Dissemination

Computer generated or other print copy, magnetic tape, microfiche or microfilm, direct access via CANSIM and in rare cases handwritten copy are the modes used to provide the data referred to in this Directory. Microdata are provided exclusively on magnetic tape. Information under this heading specifies which modes are available for a particular file and supplies, where available, CANSIM matrix or table numbers identified with the file. Outputs from CANSIM are available in the form of computer printout, magnetic tape or fiche as well as directly through computer terminal. A brief note on the Canadian Socio-Economic Information Management System (CANSIM) is provided later in this introduction.

Reference Materials

This space records, where available, sources of material that could be helpful in the understanding, interpretation and use of data derived from a particular file. Included are such things as technical documentation particularly relating to magnetic tapes, concepts and definitions, survey methodology and research papers germane to the subject content of the file.

For users desiring direct access via CANSIM, a number of reference documents are available which are not listed with individual files:

TIME SERIES

CANSIM Summary Reference Index (Cat. No. 12–202E, under revision)

CANSIM Main Base Series Directory (Cat. No. 12-X–505E)

CANSIM Mini Base Series Directory (Cat. No. 12–569E)

CANSIM Summary Data System User's Guide (Cat. No. 12-X–506E)

CANSIM Summary Data System Dictionary (Cat. No. 12-X–507E)

Related Publications

Publications listed here contain data related to the subject content of a particular file and in many cases produced from the same survey or other collection vehicle. The items listed are mainly publications either of Statistics Canada or of other federal government departments. Publications of Statistics Canada are listed with their title, originating division, language, frequency and 5-digit catalogue number.

Related publications will be found of value in determining what data have already been published on a particular subject and helpful in terms of technical notes, concepts and definitions, and examples of how data may be tabulated. Some of the Statistics Canada publications listed are not current and therefore do not appear in the most recent edition of the *Statistics Canada Catalogue* (described later under "Other Guides and Indexes").

Contact

Information under this heading provides for each file an address and telephone number to be used in requesting data or to obtain additional information. Names supplied will change but are felt to be useful nevertheless; up-to-date lists of names are available from the regional reference centres listed at the end of this introduction. The Statistics Canada divisions and sections are, of course, more permanent points of contact.

Canadian Socio-Economic Information Management System(CANSIM)

CANSIM is Statistics Canada's computerized data bank and information retrieval service. It provides detailed and timely statistical information to economists, statisticians, planners, analysts and academics in private and public sectors.

CANSIM contains the latest as well as historical statistical information. For example, Labour Force Estimates and the Consumer Price Index are available in electronic form on CANSIM on the same day they are released to the public and may be accessed simultaneously anywhere in Canada by terminal.

Business and economic statistics are available in a time series format, while social statistics and Census summary data have a cross-classified format showing various relationships at different points in time.

Secondary Distributors across Canada disseminate CANSIM data according to Statistics Canada guidelines. They offer a choice of software, telecommunications networks and technical support services. Also, CANSIM Division and the regional offices of Statistics Canada provide consulting and over-the-counter services on a cost recovery basis.

Recent CANSIM initiatives utilizing advanced technologies make access possible via TELIDON terminals for graphic display and charting, for instance with the dynamic

TELICHART system, via micro computer and via electronic messaging systems.

Further details on CANSIM may be obtained from the CANSIM Division, Statistics Canada, R.H. Coats Building, Holland Avenue, Ottawa, Ontario K1A 0T6, Telephone: (613)995-0575; and from the regional reference centres of Statistics Canada.

Other Guides and Indexes

The annual *Statistics Canada Catalogue* describes all current publications available for purchase from the agency, as of January 1, each year; it excludes publications with data more than 10 years old, titles discontinued prior to the reference year of the Catalogue and out-of-print items. A Supplement updating the Catalogue is released in mid-year. One set of the Catalogue and Supplement (one English copy and one French copy) is provided to an organization at no cost. The Catalogue can be ordered from Statistics Canada, Ottawa, K1A 0T6, or from any Statistics Canada regional reference centre.

Statistics Canada publishes numerous other guides and indexes to assist users. A companion to the *Statistics Canada Catalogue* is the *Historical Catalogue of Statistics Canada Publications, 1918-80* (Cat. No. 11-512E). Other valuable publications are, 11-513E, the *Bibliography of Federal Data Sources Excluding Statistics Canada, 1981 and 11-515, Index to Municipal Data, 1982*.

A number of publications listed in the *Statistics Canada Catalogue* may also assist users in locating needed statistics and in keeping up-to-date with new releases. They include the *Statistics Canada Daily* (11-001E), *Infomat* (11-002E), *New Surveys* (11-006), *Listing of Supplementary Documents* (11-207), *The Standard Industrial Classification* (12-501E), *The Standard Occupational Classification, 1980* (12-565E), *The Standard Geographical Classification, 1981* (12-567), *The Canadian International Trade Classification* (65-502E) and *Guide to Federal Government Labour Statistics, 1979* (72-512).

Other reference aids include: *Statistical Information on Transportation Available from Federal and Provincial Governments*, *Statistical Information on Municipalities Available from Provincial and Territorial Governments*, and the *Directory of Health Division Information*. For further information on these products, please contact any Statistics Canada regional reference centre.

Statistics Canada also publishes a number of materials designed to assist in the accessing and use of data. Among these are *Finding and Using Statistics*, *How a Manufacturer Can Profit From Facts*, *How a Retailer Can Profit From Facts*, *How Contractors and Builders Can Profit From Facts*, *How Communities Can Use Statistics*,

Understanding Labour Force Data, and Your Guide to the Consumer Price Index. Each is available from regional reference centres.

Statistics Canada Advisory Services

The agency has nine regional offices and a Central Inquiries Service in Ottawa. Offices offer the following services:

Inquiry Service: Answers requests for statistical data by telephone, letter and from visitors; provides a collection of all Statistics Canada's recent publications as well as certain historical ones for public reference; offers tabulations of certain unpublished data and other selected government statistical publications for public reference; provides visitors with study areas.

Professional Consultation Services: Assists both experienced and inexperienced users with data problems; advises on arranging direct access to CANSIM and other machine-readable systems; provides feedback to Statistics Canada on the statistical needs and problems of users.

Data Distribution and Promotion Service: Takes orders for all Statistics Canada publications and related material such as census maps and microfiche; retrieves data directly from CANSIM; provides public copying facilities for printed materials and microfiche; arranges displays to promote the use of statistical data.

Education Service: Provides booklets on finding and using statistics and distributes copies of the *Statistics Canada Catalogue* of publications; holds workshops and seminars for users on subjects of special interest on request; visits educational institutions to speak on statistical subjects, on request; arranges local training courses on statistical subjects, such as basic questionnaire design, and sampling techniques.

Data Collection Service: Arranges for the design, management and implementation of surveys for governments, institutions and private agencies; advises on all aspects of information gathering.

Data Files

1

General

13 Comprehensive Studies

13.1 Income, Assets and Debt – Microdata

Source

The sample Survey of Consumer Finances conducted by Statistics Canada in 1977.

Universe

Economic families and unattached individuals living in private dwellings in Canada, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

Data are shown for 11 component sources of family assets, including total bonds, cash on hand, registered retirement savings plans (RRSPs), registered home ownership savings plans (RHOSPs), market value of passenger cars and owner-occupied homes. Nine component sources of family income are also presented, including earnings and total income for family head and spouse; family characteristics such as status vis-à-vis low income cutoffs, number of earners, life cycle and tenure; and personal and labour-related characteristics of family head and spouse, including age, education, labour force status and occupation. In addition, data are provided for three component sources of family debt – consumer debt, personal debt and mortgage outstanding on owner-occupied home – as well as data on total net worth.

Geographic Coverage

Codes are given for regions and size of area of residence categories with the following populations: 100,000 or more, 30,000 – 99,999, 15,000 – 29,999, urban less than 15,000, and rural areas.

Frequency and Time Span

The tape covers income received in the 1976 calendar year and assets and debts in the spring of 1977.

Size of File

12,734 records.

Mode of Dissemination

Tape only.

Reference Materials

Extensive documentation is provided with each tape, including a questionnaire facsimile, a description of each variable, the non-catalogued report *Evaluation of Data on Family Assets and Debts* and the record layout.

Related Publications

Ottawa, Ontario K1A 9Z9

13.2 Consumer Income Divisional Master File – Special request tabulations

Source

The sample Survey of Consumer Finances conducted by Statistics Canada.

Universe

Economic families, census families and income recipients 15 years and over are surveyed. Each universe is derived from a sample of Canadian households living in private dwellings, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

For each universe 16 component sources of income are available as well as total income and income after tax. Personal and labour-related characteristics of individuals and family members are shown including age, sex, education, immigration status, occupation and weeks worked. Family characteristics such as tenure, life cycle, number of earners and number of children are also included.

Geographic Coverage

Provinces and five size of area of residence categories: over 500,000, 100,000 to 499,999, 30,000 to 99,999, less than 30,000 and rural. Specific large urban areas can be tabulated individually or in groups depending upon their sample size.

Frequency and Time Span

Biennial data, from 1965 to 1969; annual data, from 1971. The sample sizes for 1980, 1978, 1976, 1974, 1972, 1969 and 1965 are smaller than for other years.

Size of File

Approximately 65,000 income recipients, 37,000 economic families and 39,000 census families are on file. For each family or income recipient, there are about 50 variables available for cross-classification.

Mode of Dissemination

Computer printout and tape.

Massaging of Data

A variety of services are available, including data transformations and regressions.

Reference Materials

Questionnaire facsimiles are available in the publications listed below. Record layouts, lists of variables and codes are available upon request.

13.3**Survey of Consumer Finances – Off-the-shelf tabulations****Source**

A sample survey conducted by Statistics Canada.

Universe

Economic families, census families, individuals 15 years of age or older with income and individuals with earnings. Each universe is derived from a sample of Canadian households living in private dwellings, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

These tabulations show percentage distributions of each universe by major source and composition of income; by demographic characteristics including number of persons, age of head, sex of head and mother tongue; by labour force characteristics, including unemployment of family members, wives' earning status, full-time or part-time status by age, sex, province, education, occupations, etc.; by incidence of low income; and by special analysis runs containing quintiles and Gini coefficients.

Geographic Coverage

Provinces and size of area of residence categories with the following populations: urban with 500,000, urban with 100,000–499,999, urban with 30,000–99,999, urban with 15,000–29,999, small urban areas and rural areas; and one table on selected metropolitan cities, including St. John's, Halifax, Hamilton/Burlington, London, Kitchener/Waterloo, Winnipeg, Calgary, Edmonton, Vancouver and Victoria.

Additional Information

Most of the information in this file appears in Statistics Canada publications but with fewer income groupings (see Related Publications listed below).

Frequency and Time Span

Biennial data, from 1965–69; annual data, from 1971.

Size of File

Approximately 140 tabulations.

Mode of Dissemination

Computer printout.

Reference Materials

Variable definitions are supplied with the off-the-shelf tabulations.

13.4

Income of Census Family Units – Microdata

Source

The sample Survey of Consumer Finances conducted by Statistics Canada.

Universe

Census families and persons not in families living in private dwellings in Canada, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

Data are shown for 14 component sources of family income and for earnings, transfers and total income of head of family and spouse. Family characteristics such as number of family members, number of children, number of earners, life cycle and tenure are also given. In addition, personal and labour-related characteristics of the head and spouse, including age, education, mother tongue, labour force status and occupation are provided.

Geographic Coverage

Codes are given for provinces and size of area of residence categories with the following populations: 100,000 or more, 30,000 – 99,999, urban less than 30,000, and rural areas.

Frequency and Time Span

Biennial data, from 1971. Income is that received in a calendar year.

Size of File

1979 39,906 records.
1977 39,782 records.
1975 28,613 records.
1973 28,226 records.
1971 25,927 records.

Mode of Dissemination

Tape only.

Reference Materials

Extensive documentation is provided with each tape, including a questionnaire facsimile, a description of each variable and the record layout.

Related Publication

13.5

Income of Economic Family Units – Microdata

Source

The sample Survey of Consumer Finances conducted by Statistics Canada.

Universe

Economic families and unattached individuals living in private dwellings across Canada. Residents of Indian reserves, the Yukon and the Northwest Territories are excluded.

Subject Content

This file shows data on earnings, transfers and total income for the head of the economic unit and spouse and presents data for 14 component sources of family income. In addition, family characteristics such as status vis-à-vis low income cutoffs, number of earners, life cycle and tenure are provided. Personal and labour-related characteristics of the head of the economic unit and spouse such as age, education, mother tongue, labour force status and occupation are also shown.

Geographic Coverage

Codes are given for all provinces and size of area of residence categories of 100,000 or more population, 30,000 to 99,999 population, urban areas with less than 30,000 population, and rural areas.

Frequency and Time Span

Biennial data, from 1973. Income is that received in a calendar year.

Size of File

1979, 37,440 records.
 1977, 37,109 records.
 1975, 25,569 records.
 1973, 25,924 records.

Mode of Dissemination

Tape only.

Reference Materials

Extensive documentation is provided with each tape including a questionnaire facsimile, a description of each variable and the record layout.

13.6**National Income and Expenditure Accounts – Special request tabulations****Source**

The estimates contained in the Income and Expenditure Accounts are derived from Statistics Canada surveys, including the Census of Manufactures and the Survey of Retail Sales, and administrative records from other federal departments.

Universe

Estimates cover all sectors – business, government, persons and non-residents – of the Canadian economy.

Subject Content

The Income and Expenditure Accounts provide data on the composition and use of the nation's output, on the types of income generated in producing this output, and on the income and expenditure transactions between sectors which underlie the production and distribution of output. The annual estimates cover the complete sector accounts system; quarterly estimates cover the main tables only.

Geographic Coverage

Annual and quarterly data are available for Canada. In addition, selected annual data relating to domestic product, personal income, and government revenue and expenditure are available by province.

Frequency and Time Span

Annual data are available from 1926 with the exception of the provincial data relating to domestic product and government revenue and expenditure, which are available from 1961. Quarterly estimates are available from 1947.

Size of File

Approximately 75 variables.

Massaging of Data

Some analytical services can be provided.

Mode of Dissemination

Computer printout only.

13.7**Local Government Component of National Accounts – Off-the-shelf tabulations****Source**

Statistics Canada surveys, provincial and municipal government records and Statistics Canada financial management series.

Universe

All municipalities in Canada.

Subject Content

Details of local government component of national accounts, revenue and expenditure. Annual functional breakdown of expenditures; source and details of revenue.

Geographic Coverage

All provinces.

Additional Information

Revenue and expenditure in detail greater than in National Accounts publications.

Frequency and Time Span

Quarterly and annual data from 1961.

Size of File

One tabulation.

Mode of Dissemination

Computer printout and CANSIM.

13.8**Personal Income Tax File (10% sample) –
Special request tabulations****Source**

Administrative data from a federal government department.

Universe

All individuals filing personal income tax returns. Data are derived from a 10% sample.

Subject Content

This file has information on taxfilers including age, sex, marital status and sources of income.

Geographic Coverage

Provinces and Revenue Canada locality code.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1967.

Size of File

Approximately 16 variables.

Massaging of Data

The complexity of this data file requires extensive consultation and negotiation in order to produce a custom tabulation.

Mode of Dissemination

Tape and computer printout.

Reference Materials

Statistics Canada. Administrative Data Development Division. *The Use of Administrative Social Data: Overview and Guide.* Available upon request.

13.9**Personal Income Tax File (100% sample) –
Special request tabulations****Source**

Administrative records from a federal government department.

Universe

All individuals filing personal income tax returns.

Subject Content

This file has information on taxfilers such as age, sex, marital status and source of income.

Geographic Coverage

Postal code and census tracts for 10 census metropolitan areas.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1976.

Size of File

Approximately 16 variables.

Massaging of Data

Tabulations for customer-specified geographical areas (based on postal codes) are available on provision of a postal code translation file.

Mode of Dissemination

Tape and computer printout.

Reference Materials

Statistics Canada. Administrative Data Development Division. *The Use of Administrative Social Data: Overview and Guide*. Available upon request.

13.10**Experimental Administrative Tax Data – Off-the-shelf tabulations****Source**

Administrative records from a federal government department.

Universe

All individuals filing personal income tax returns.

Subject Content

The file is in two parts. A labour force profile includes counts of taxfilers, aggregate amounts and medians of sources of income associated with labour force participation (by sex). An economic dependency profile includes data on taxable transfer payments related to employment income to compute an economic dependency ratio.

Geographic Coverage

Provinces, census divisions and federal electoral districts.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1976.

Size of File

Two tabulations.

Mode of Dissemination

Computer printout only.

Reference Materials

Statistics Canada. Administrative Data Development Division. *The Use of Administrative Social Data: Overview and Guide*. Available upon request.

14**Productivity Studies****14.1****Labour Productivity, Unit Labour Cost and Related Data – Off-the-shelf tabulations****Source**

Various Statistics Canada census and sample surveys.

Universe

Total domestic economy; all commercial industries; several industry aggregations.

Subject Content

Indexes and/or actual numbers for persons employed and paid workers; man-hours worked of persons employed and paid workers; output per person and per man-hour worked; average hours worked per week of persons employed and paid workers; labour compensation; labour compensation per person employed and per man-hour worked; unit labour cost.

Geographic Coverage

Canada.

Additional Information

Indexes for the variables described above are carried in *Aggregate Productivity Measures* noted below: the actual numbers do not appear in any publication.

Frequency and Time Span

Annual, from 1946 to 1981.

Size of File

36 CANSIM matrices.

Massaging of Data

CANSIM standard preformatted manipulations.

Mode of Dissemination

CANSIM time series data base, matrix numbers 601-624, 1106-1117.

Related Publication

15 Input-Output Tables

15.1 Input-Output Data Base – Special request tabulations

Source

Various Statistics Canada surveys.

Universe

All economic units.

Subject Content

The input-output tables contain two sets of inter-related accounts: the commodity accounts which detail the supply and disposition of individual commodities (goods and non-factor services) and the industry accounts which show the composition of the output of industries and the complete costs of production (including profits) of industries.

Geographic Coverage

Canada.

Additional Information

A detailed data base consisting of 191 industries, 602 commodities and 136 final demand categories exists, but many of the entries are confidential. A public version of this data base in which confidential entries are suppressed and values rounded from thousands to millions is available.

Constant dollar data are provided in 1961 prices for the years 1961 to 1971, and in 1971 prices for 1971 to 1979.

Frequency and Time Span

Annual, from 1961 to 1979.

Size of File

Approximately six variables: time, industry, commodity, type of matrix, valuation, and final demand category.

Massaging of Data

Matrix manipulations; output and price determination model simulations.

Mode of Dissemination

Tape, computer printout and computer card.

Related Publications

Statistics Canada. Input-Output Division. *System of National Accounts, The Input-Output Structure of the Canadian Economy*. Annual. E and F. Cat. No. 15–201E.

15.2 Input-Output Data Base: L Aggregation Industry and Commodity Totals – Special request tabulations

Source

Various Statistics Canada surveys.

Universe

All economic units.

Subject Content

Industry and commodity aggregates at the L level of detail. Data are available in both current and constant dollars. Note that the L level is the most detailed of three designated levels of aggregation (S, M and L). See Statistics Canada publication Cat. No. 15–201E listed below for further information concerning the three levels of aggregation.

Geographic Coverage

Canada.

Additional Information

Industry data includes total intermediate inputs, net indirect taxes, labour income (current dollars only), gross domestic product at factor cost, gross output and employment. Commodity aggregates consist of intermediate inputs, exports, imports, other final demand and gross output.

Gross output, exports and imports by commodity provide all the detail necessary to obtain domestic availability by commodity at the 595 commodity detail level.

Constant dollar data are provided in 1961 prices for the years 1961 to 1971, and in 1961 prices for 1971 to 1979.

Frequency and Time Span

Annual, from 1971 to 1979.

Size of File

Approximately six variables: time, industry, commodity, final demand category, valuation, type of matrix.

Mode of Dissemination

CANSIM cross-classified data base, table numbers 0012109 to 00120114.

Related Publications

15.3

Interprovincial Input-Output Tables – Off-the-shelf and special request tabulations

Source

Input-Output data base.

Universe

All economic units.

Subject Content

Input-Output accounts of production and use of goods and services on a provincial basis.

Geographic Coverage

All provinces and the Yukon and Northwest Territories combined.

Additional Information

For each province there is a make or output matrix, a use or input matrix and a final demand matrix. Also available is a trade matrix showing the commodity flows among provinces and with the rest of the world.

Frequency and Time Span

Occasional, 1974, 1979.

Size of File

Approximately seven variables: time, industry, commodity, final demand category, type of matrix, valuation, province.

Massaging of Data

Matrix manipulations and interprovincial input-output model solutions.

Mode of Dissemination

Tape, computer printout.

Reference Materials

Statistics Canada. Input-Output Division. *The Interprovincial Model*.

Primary Industries

21

Farm Income, Values and General Production

21.1

Farm Cash Receipts – Special request tabulations

Source

Statistics Canada sample surveys, including the Farm Prices Survey; administrative records from Agriculture Canada; provincial departments of agriculture; federal and provincial agencies, such as the Canadian Grain Commission; marketing boards and agri-business firms.

Universe

Farms that annually sell at least \$250 worth of agricultural products.

Subject Content

Data are provided on the quantities and prices of selected agricultural products sold by farms: animal and livestock products, grains, legumes and grass seeds, fruits and vegetables. In addition, data on subsidies to farmers, including payments under the Western Grain Stabilization plan, provincial income stabilization programs and the dairy supplementary program, are given.

Geographic Coverage

Canada; all provinces except Newfoundland.

Frequency and Time Span

Annual data, from 1926; monthly data, from 1947.

Size of File

Approximately 70 variables.

Mode of Dissemination

Worksheets only.

Related Publications

Statistics Canada. Agriculture Statistics Division. *Farm Cash Receipts*. Annual. Bilingual. Cat. No. 21–001.

Income-in-kind – Special request tabulations

Source

Statistics Canada sample surveys, including the Farm Prices Survey; administrative records from Agriculture Canada; provincial departments of agriculture; federal and provincial agencies, such as the Canadian Grain Commission; marketing boards and agri-business firms.

Universe

Farms that annually sell at least \$250 worth of agricultural products.

Subject Content

This file presents information on the prices and quantities of selected products consumed by farmers in the farm home (income-in-kind): potatoes, fruits, vegetables, cattle, calves, hogs, lambs, dairy products, poultry, eggs, wool, honey, forest products and maple products.

Geographic Coverage

Canada; all provinces except Newfoundland.

Frequency and Time Span

Annual data, from 1926.

Size of File

Approximately 15 variables.

Mode of Dissemination

Worksheets only.

Related Publication

21.3**Value of Inventory Change – Special request tabulations****Source**

Statistics Canada sample surveys, including the Farm Prices Survey; administrative records from Agriculture Canada; provincial departments of agriculture; federal and provincial agencies, such as the Canadian Grain Commission; marketing boards and agri-business firms.

Universe

Farms that annually sell at least \$250 worth of agricultural products.

Subject Content

This file gives information on the quantities and average prices or values of agricultural products that are carried as inventories on the farm: wheat, oats, barley, rye, corn, flaxseed, canola, soybeans, potatoes, tobacco, sheep and lambs, cattle, calves, hogs and poultry. The dollar values of Canadian Wheat Board cash advances and repayments, deferred grain receipts and the liquidation of deferred grain receipts are also included.

Geographic Coverage

Canada; all provinces except Newfoundland.

Frequency and Time Span

Annual data, from 1926.

Size of File

Approximately 35 variables.

Mode of Dissemination

Worksheets only.

Related Publication

21.4**Farm Energy Use – Special request tabulations****Source**

A probability sample survey conducted by Statistics Canada.

Universe

Farm operators with sales over \$5,000.

Subject Content

Data are given on energy expense, quantities used, machinery complement, conservation techniques and fertilizer applications.

Geographic Coverage

All provinces. In addition, some subprovincial breakdowns may be provided depending upon the complexity of the request.

Frequency and Time Span

Benchmark data for 1981. Only the information on energy expenditure and use will be updated annually from 1981.

Size of File

Approximately 400 variables.

Massaging of Data

Some services may be provided depending upon the complexity of the request.

Mode of Dissemination

Computer printout and microfiche.

Related Publication

21.5**Index of Farm Production – Special request tabulations****Source**

Statistics Canada sample surveys, including the Farm Prices Survey; administrative records from Agriculture Canada; provincial departments of agriculture; federal and

provincial agencies, such as the Canadian Grain Commission; marketing boards and agri-business firms.

Universe

Farms that annually sell at least \$250 worth of agricultural products.

Subject Content

The index measures changes, through time, in the production of more than 90 agricultural products sold in the marketplace, carried in farm inventories or consumed directly in farm households. In addition, the index also records, for each commodity, changes in the volume of sales, inventory, income-in-kind, the average annual price and the dollar value of sales and production.

Geographic Coverage

Canada and provinces.

Frequency and Time Span

Annual data: Newfoundland, from 1971 only; all other provinces, from 1951.

Size of File

Approximately 12 variables.

Mode of Dissemination

Tape and computer printout.

Reference Materials

If a tape is issued, complete documentation, including the record layout and a description of the variables, is supplied.

21.6**Self-Employed File of Unincorporated Farm Taxfilers – Special request tabulations****Source**

Federal department administrative records.

Universe

All unincorporated taxfilers reporting gross farm income greater than zero.

Subject Content

Data on unincorporated farm taxfilers include gross farm income, net farm income and off-farm income such as pension income and income from off-farm work.

Geographic Coverage

Counties only; locality codes which can be grouped to form counties and provinces.

Additional Information

None of the information in this file appears in a Statistics Canada publication.

Frequency and Time Span

Annual data, from 1971.

Size of File

Approximately 60 variables.

Massaging of Data

A variety of services are available, including data transformations and regressions.

Mode of Dissemination

Computer printout only.

21.8**1978 Saskatchewan Enumerative Survey – Microdata.****Source**

A sample survey conducted by Statistics Canada.

Universe

Farms in Saskatchewan. Community pastures, certain very large farms and Hutterite colonies are excluded.

Subject Content

The survey collects information on Saskatchewan farms including type of operation, land use, livestock and poultry inventories, credit (loans), expenses, farm and non-farm income, number of years in operation and farm labour.

Geographic Coverage

Geographic areas below the provincial level are not identified on the tape.

Frequency and Time Span

A one-time survey: land use and livestock and poultry inventory data, for July 1, 1978; financial and labour data, for the 1977 calendar or fiscal year.

Size of File

1,450 records.

Mode of Dissemination

Tape only.

Reference Materials

Documentation for Release of Tape from 1978 Saskatchewan Enumerative Survey. This guide has the record layout, the sample design, a questionnaire facsimile and general information about the data. Available upon request.

22**Farm Crops****22.1****Farm Supply and Disposition of Major Grains – Off-the-shelf tabulations****Source**

Statistics Canada sample surveys on field crop acreage, yield, production and stocks; and data from organizations such as the Canadian Grain Commission and the Livestock Feed Board of Canada.

Universe

Canadian farmers, licensed elevators receiving grain from farmers and grain handlers using feed freight assistance.

Subject Content

This file presents statistics on farm supply and disposition of wheat, oats, barley, rye, flaxseed and rapeseed. Variables include farm stocks; production; freight assistance; grain shipments under the Feed Freight Assistance Act; marketing (producer deliveries to licensed elevators); feed, waste and dockage; total supplies and disposition.

Geographic Coverage

Canada; Western Canada by province (Alberta, Saskatchewan and Manitoba); and Ontario and Québec for certain variables only.

Frequency and Time Span

Annual data, from 1953–54.

Size of File

Approximately 24 tabulations.

Mode of Dissemination

Computer printout and photocopies.

Massaging of Data

Services are offered on a cost-recovery basis.

Related Publications

22.2**Handbook of Supply/Disposition Analysis – Off-the-shelf tabulations****Source**

Statistics Canada sample surveys on field crop acreage, yield, production and stocks; censuses on milling and crushing operations; and data from other organizations such as the Canadian Grain Commission.

Universe

All Canadian farmers, all companies that mill grain for human consumption, all crushing companies, all licensed grain elevators, and all vessels that handle grain.

Subject Content

Data are provided, in metric tonnes, on the supply and disposition of wheat, oats, barley, rye, flaxseed and rapeseed. Some of the variables include: beginning and

ending stocks, production, imports, grain and grain product exports, and domestic disappearance.

Geographic Coverage

Canada only.

Additional Information

Published data have been rearranged to provide a consolidation of all information by grain commodity.

Frequency and Time Span

Annual data, from 1933–34.

Size of File

Approximately 15 tabulations.

Massaging of Data

Some services are offered on a cost-recovery basis.

Mode of Dissemination

The Crops Section provides data from this file on computer printout only. The data are also available on the CANSIM Time Series Module (matrix numbers 5679 to 5685).

Related Publications

22.3**Forage Seed Usage Survey – Off-the-shelf tabulations****Source**

A census of all wholesale firms in the forage seed business conducted by Statistics Canada.

Universe

Wholesale firms shipping legume and grass seed to farmers and dealers in Québec, Ontario and the Atlantic provinces.

Subject Content

The quantities sold – in pounds or kilograms – are given for the following legumes and grass seeds: alfalfa, sweet clover, red clover, white clover, alsike clover, timothy, orchard grass, reed canary grass, perennial

ryegrass, annual ryegrass, meadow fescue, tall fescue, birdsfoot trefoil, brome grass and some varieties within these groups.

Geographic Coverage

Québec, Ontario and the Atlantic provinces.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1978.

Size of File

Five tabulations.

Mode of Dissemination

Typewritten copy.

22.4

Ontario Seed Corn Sales – Off-the-shelf tabulations

Source

A census of wholesale firms in the seed corn business conducted by Statistics Canada.

Universe

Ontario wholesale firms that ship seed corn for planting.

Subject Content

Information is given on the units of seed corn sold for grain and fodder (1 unit = approximately 80,000 kernels); the estimated average retail price per unit; the estimated area (available in hectares or acres) planted from the sales; exports; imports and carryover stocks.

Geographic Coverage

Canada, Atlantic provinces, Québec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1969.

Size of File

Five tabulations.

Mode of Dissemination

Typewritten copy.

22.5

Fruit, Vegetable and Tobacco Production – Special request tabulations

Source

Provincial committees and reports.

Universe

Fruit and vegetable processors and tobacco marketing boards.

Subject Content

Data are presented on the production and value of specified fruits, vegetables and tobacco. For vegetables and tobacco only, data are also shown for acreage and yield.

Geographic Coverage

Canada and provinces.

Frequency and Time Span

Annual data: for vegetables, from 1947; for tobacco, from 1978; and for fruits, from 1926 and some fruits from 1960.

Size of File

Approximately 30 variables.

Massaging of Data

Information on services available, including APL (advanced programming language) applications, can be obtained from CANSIM Division at the address below.

Mode of Dissemination

The data are available on the CANSIM Time Series module (matrix numbers 1393-1406, 5587-5610 and 1056-58).

Reference Materials

22.6**Historical Series of Field Crop Statistics – Off-the-shelf tabulations****Source**

Crop reporting sample surveys conducted by Statistics Canada.

Universe

Canadian farmers.

Subject Content

Historical data on acreage, yield, production, and price and value estimates by province for the main types of field crops, oilseeds and forages.

Geographic Coverage

All provinces except Newfoundland.

Additional Information

Rearrangements of published data to provide a consolidation of all information by field crop. In addition, some data are revisions of previously published estimates.

Frequency and Time Span

Annual data, from 1908.

Size of File

Approximately 160 tabulations.

Mode of Dissemination

The data are available from the Crops Section on computer printout. The data are also available on the CANSIM Time Series Module (matrix numbers 1025 to 1048).

23**Farm Livestock and Animal Products****23.1****Poultry Meat Production and Cash Receipts – Off-the-shelf tabulations****Source**

Administrative data from Agriculture Canada.

Universe

Farms that purchase chicks and poultry from Canadian hatcheries.

Subject Content

Four subfiles are available. Subfile A gives placements on farms of broilers, roasters, egg production males, half of mixed lots, breeding stock males, broiler poults and heavyweight poults. Subfile B has the end-of-month inventory figures for Subfile A. Subfile C gives monthly figures on inventory changes for broilers, pullets, cockerels and turkeys. Subfile D contains figures on production, prices and cash receipts for broilers, fowl, heavy chickens and turkeys.

Geographic Coverage

Canada and provinces.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Monthly data, from May 1978.

Size of File

Eight tabulations.

Mode of Dissemination

Subfile A is on the CANSIM Time-Series Module-matrix number 5639 (chickens) and matrix number 5640 (turkeys). Subfile D is on the CANSIM Cross-Classified Module (table number 00190501).

Subfile B and C are available on computer printouts only from the Livestock and Animal Products Section.

23.2**Value Per Head of Livestock on Farms – Off-the-shelf tabulations****Source**

The following sample surveys conducted by Statistics

Canada: the National Livestock Survey and the National Farm Survey. The figures on values are obtained from experts in the industry.

Universe

Ranchers, farms and agricultural holdings that annually sell at least \$250 worth of agricultural products.

Subject Content

Annual inventories of milk cows, calves (less than six months old and more than six months old), all other cattle, sheep, lambs, total sheep and lambs, boars, sows and all other pigs (less than 20 kg, 45-120 kg and more than 130 kg). The farm value per head for each category of livestock and the total farm value for each category are provided.

Geographic Coverage

All provinces except Newfoundland.

Frequency and Time Span

Annual data (at July 1), from 1967.

Size of File

Three tabulations.

Mode of Dissemination

Worksheets only.

Reference Materials

Statistics Canada. Agriculture Statistics Division. *Data Collection and Estimating Procedures of the Livestock Estimating Unit* (Agriculture Methodology Paper No. 3). Occasional. E. and F.

Related Publication

Statistics Canada. Agriculture Statistics Division. *Report on Livestock Surveys*. Quarterly. Bilingual. Cat. No. 23-008.

23.3**Grain Consuming Animal Units – Off-the-shelf tabulations****Source**

The following sample surveys conducted by Statistics Canada: the National Livestock Survey and the National Farm Survey. In addition, administrative data from Agriculture Canada.

Universe

Farms, ranches and agricultural holdings that annually sell \$250 worth of agricultural products.

Subject Content

Annual inventories of cattle, pigs, sheep and lambs, chickens, turkeys and geese, and ducks are given. In addition, the predetermined factors used to calculate annual feed grain requirements in metric tonnes are provided.

Geographic Coverage

Canada and provinces.

Frequency and Time Span

Semi-annual data (available on January 1 and July 1), from 1972.

Size of File

Two tabulations.

Mode of Dissemination

The data are available on the CANSIM Time Series Module (matrix numbers 9526 to 9535).

Reference Materials

Statistics Canada. Agriculture Statistics Division. *Data Collection and Estimating Procedures of the Livestock Estimating Unit* (Agriculture Methodology Paper No. 3). Occasional. E and F.

23.4**Uninspected Slaughter – Off-the-shelf tabulations****Source**

A sample survey conducted by Statistics Canada.

Universe

Slaughterhouses not covered by federal or provincial inspection in Québec and Saskatchewan.

Subject Content

Quarterly statistics are provided for the numbers of cattle, calves, sheep, lambs and pigs slaughtered.

Geographic Coverage

The provinces of Québec and Saskatchewan.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Quarterly data, from 1954.

Size of File

Four tabulations (two tabulations for each province).

Mode of Dissemination

Worksheets only.

Reference Materials

Statistics Canada. Agriculture Statistics Division. *Data Collection and Estimating Procedures of the Livestock Products Unit* (Agriculture Methodology Paper No. 3). Occasional. E and F.

23.5**Balance Sheets for Pigs, Cattle, Calves, Lambs and Sheep – Off-the-shelf tabulations****Source**

The following sample surveys conducted by Statistics Canada: the National Farm Survey, the National Livestock Survey and the Slaughter Survey. In addition, administrative data from Agriculture Canada, Statistics Canada and the provincial government departments of agriculture.

Universe

As the sources indicate, a number of universes are involved. More information can be obtained from the contact listed below.

Subject Content

For each category of livestock the following items are available: beginning and ending inventories, births, interprovincial imports and exports, international imports and exports, killed and eaten, killed and sold on farms, death loss, condemnations, all inspected slaughter and other commercial slaughter.

Geographic Coverage

All provinces except Newfoundland.

Frequency and Time Span

Semi-annual data (available on January 1 and July 1), from 1976.

Size of File

Six tabulations a year (one tabulation for each category of livestock is produced semi-annually).

Mode of Dissemination

MICOM printed copies only.

Reference Materials

Data Collection and Estimating Procedures of the Livestock Estimating Unit (Agriculture Methodology paper No. 3). Occasional. E and F.

3 & 4

Manufacturing

31 General Surveys

31.1 Hours Worked and Inventories in Manufacturing – Off-the-shelf tabulations

Source

Statistics Canada Census of Manufactures and administrative records.

Universe

All manufacturing industries in Canada.

Subject Content

Number of hours worked for production workers in manufacturing; inventories (opening and closing balances) in manufacturing for four categories – raw material, goods in process, finished products and goods purchased for resale.

Geographic Coverage

Canada and provinces only.

Additional Information

Data provided by Standard Industrial Classification (SIC) industry by province.

Frequency and Time Span

Annual, from 1961 to 1980.

Size of File

Approximately 225 tabulations for 169 (SIC) industries.

Mode of Dissemination

Tape, computer printout and via CANSIM.

Reference Materials

Statistics Canada. Manufacturing and Primary Industries Division. *Concepts and Definitions of the Census of Manufactures*. Occasional. Bilingual. Cat. No. 31 – 528.

Statistics Canada. Standards Division. *Standard Industrial Classification, 1980*. Occasional. E and F. Cat. No. 12 – 501E.

31.2 Inventories, Shipments and Orders in Manufacturing Industries – Special request tabulations

Source

Monthly sample survey of shipments, inventories and orders conducted by Statistics Canada.

Universe

All manufacturing industries in Canada. Data are estimates generated from a systematic stratified sample.

Subject Content

Manufacturers' dollar value of shipments of goods of own manufacture, inventories and orders classified by Standard Industrial Classification (SIC) and by an economic use classification subject to confidentiality requirements.

Geographic Coverage

Canada and provinces for shipments; Canada only for inventories and orders.

Frequency and Time Span

Global estimates, monthly from January 1949. Revisions of monthly estimates for three previous years are made annually.

Size of File

Approximately nine variables.

Mode of Dissemination

Tape and via CANSIM.

Reference Materials

Explanations of limitations concerning each series requested are provided.

Related Publication

Statistics Canada. Manufacturing and Primary Industries Division. *Inventories, Shipments and Orders in Manufacturing Industries*. Monthly. Bilingual. Cat. No. 31-001.

31.3

Manufacturing and Primary Industries Division Census File – Special request tabulations

Source

Statistics Canada Censuses of Manufactures, Mines and Logging.

Universe

Establishments and ancillary units of the manufacturing, mining and logging industries. Certain information is not available for smaller establishments.

Subject Content

Principal operating statistics, including values of materials and supplies used, shipments and value added, and employment. Quantities and values of purchased material inputs and of outputs classified by industrial commodity classification.

Geographic Coverage

Provinces and territories, economic regions, census metropolitan areas, counties and municipalities.

Additional Information

Each respondent record is classified as to industry, location, legal entity, enterprise and country of control.

Frequency and Time Span

Annual, from 1961.
Commodity inputs and outputs from 1975.
Enterprise codes from 1970.

Size of File

Approximately 20 variables (35,000 records per year).

Massaging of Data

The user can define virtually any aggregation or statistical procedure to be applied to the data. Provision of results is subject to the usual confidentiality rules.

Mode of Dissemination

Tape and computer printout.

Reference Materials

31.4

Domestic and Foreign Control of Manufacturing Establishments, Preliminary – Off-the-shelf tabulations

Source

Statistics Canada Census of Manufactures.

Universe

Establishments and ancillary units classified to the manufacturing industries.

Subject Content

Preliminary information on the domestic and foreign control of manufacturing establishments well in advance of the data published in Cat. No. 31-401 (noted below). Data include number of establishments and employees, cost of fuel and electricity, cost of materials and supplies used, value of shipments and value added, by country of control (Canada, United States, other foreign).

Geographic Coverage

Canada and provinces.

Additional Information

This preliminary data does not appear in Statistics Canada publications but its availability is announced in the *Statistics Canada Daily* (Cat. No. 11 – 001E).

Frequency and Time Span

Biennial, from 1970.

Size of File

One tabulation (50 pages).

Mode of Dissemination

Tape and computer printout.

Related Publication

31.5**Industrial Organization and Concentration in the Manufacturing Industries, Preliminary – Off-the-shelf tabulations.****Source**

Statistics Canada Census of Manufactures.

Universe

Establishments and ancillary units classified to the manufacturing industries.

Subject Content

Preliminary information on concentration ratios well in advance of the data published in Cat. No. 31 – 402 (noted below).

Geographic Coverage

Canada only.

Additional Information

This preliminary data does not appear in Statistics Canada publications but its availability is announced in the *Statistics Canada Daily* (Cat. No. 11 – 001E).

Frequency and Time Span

Biennially, from 1970.

Size of File

One tabulation (40 pages).

Mode of Dissemination

Tape and computer printout.

Related Publication

31.6**Manufacturing Statistics – Special request tabulations****Source**

Statistics Canada Census of Manufactures Survey and administrative records.

Universe

All active manufacturing establishments in Canada.

Subject Content

Data on principal statistics of manufacturing activity including employment and financial data.

Geographic Coverage

By province, economic region, county, census metropolitan area (CMA), census agglomeration (CA), and municipality.

Frequency and Time Span

Annual, from 1961 (provincial) or from 1973 to 1980 (sub-provincial detail).

Size of File

Approximately 27 variables.

Massaging of Data

Sorts by various criteria for example by Standard Industrial Classification (SIC) or by Standard Geographical Classification (SGC).

Mode of Dissemination

Tape (1961 to 1980), computer printout and via CANSIM.

Reference Materials

Statistics Canada. *Standard Industrial Classification, 1980*. Occasional. E and F. Cat. No. 12 – 501E.

31.7

Census of Manufactures – Special request tabulations

Source

Statistics Canada Census of Manufactures.

Universe

All manufacturing establishments.

Subject Content

Principal statistics such as number of establishments, number of employees, salaries and wages, value of shipments of goods of own manufacture, value added, and commodity detail for all manufacturing.

Geographic Coverage

Canada, provinces, regions and user defined small areas.

Additional Information

Custom tabulations provided for user defined industry and geographical detail.

Frequency and Time Span

Annual, from 1975 to 1981.

Size of File

Approximately 200 variables.

Mode of Dissemination

Computer printout.

Reference Materials

Exports by Country of Control, 1974 and 1979 – Off-the-shelf tabulations

Source

Statistics Canada Census of Manufactures.

Universe

Manufacturing establishments responding to the special questions on destination of shipments on the 1974 and 1979 Censuses of Manufactures.

Subject Content

The value of exports and the percentage accounted for by foreign – controlled establishments.

Geographic Coverage

Canada.

Additional Information

This information does not appear in any Statistics Canada publications.

Frequency and Time Span

1974 and 1979, when the destination of shipments question is included on the Census of Manufactures.

Mode of Dissemination

Computer printout.

Size of File

One tabulation for 1974 and one for 1979.

Related Publications

32**Foods, Beverages and Tobacco****32.1****Apparent Per Capita Food Consumption –
Special request tabulations****Source**

Sample surveys conducted by Statistics Canada and reports from other federal government departments.

Universe

Canadian manufacturers and farms.

Subject Content

This file supplies data on production, imports, stocks, manufacturing, waste and per capita consumption by year and by day of various food commodities such as cereals, sugars, fruit and vegetables, dairy products, meat and fish.

Geographic Coverage

Canada.

Frequency and Time Span

Annual data, from 1960.

Size of File

Approximately 200 variables.

Massaging of Data

Information on services available, including APL (Advanced Programming Language) applications, can be obtained from CANSIM Division at the address below.

Mode of Dissemination

The data are available on the CANSIM cross-classified module (table numbers 00190101 to 00190115).

Reference Materials

32.2**Quarterly Per Capita Meat Consumption in
Canada – Off-the-shelf tabulations****Source**

Administrative data collected by Statistics Canada and Agriculture Canada.

Universe

As the sources indicate, a number of universes are involved. More information can be obtained from the contact listed below.

Subject Content

For each type of meat (beef, veal, mutton and lamb, and pork), the following information is available: animals slaughtered, estimated dressed weight, imports, exports, beginning stocks, ending stocks and domestic per capita consumption.

Geographic Coverage

Canada totals only.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Quarterly data, from 1971.

Size of File

Sixteen tabulations (four tabulations are available quarterly).

Mode of Dissemination

Worksheets only.

Reference Materials

Statistics Canada. Agriculture Statistics Division. *Data Collection and Estimating Procedures of the Livestock Estimating Unit* (Agriculture Methodology Paper No. 3). Occasional. E and F.

51

Air Transport

51.1

Inbound/Outbound Passengers by Airport – Off-the-shelf tabulations

Source

The System Passenger Origin and Destination Survey conducted by Statistics Canada.

Universe

Canadian and American airline carriers operating under a special category (with a Class 2, 3, 9–2 or 9–3 licence).

Subject Content

An annual summary of the number of enplanements, deplanements and aircraft departures at each airport by month.

Geographic Coverage

Provinces and territories.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1953.

Size of File

One tabulation.

Mode of Dissemination

Summary sheets (printed copy).

Domestic Air Charter Statistics – Off-the-shelf tabulations

Source

The Domestic Air Charter Survey conducted by Statistics Canada.

Universe

Canadian air carriers that operate domestic advance booking, domestic inclusive tour or domestic common purpose air charter operations using aircraft with gross take-off weight greater than 18,000 pounds.

Subject Content

Two tabulations are available. Table 1 is a summary of domestic passenger charters by carrier and charter type giving: flights, passenger trips, seats available, and load factors and revenues. Table 2 contains a summary of domestic charter passengers by origin and destination.

Geographic Coverage

Provinces and territories.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Monthly, quarterly and annual data, from 1978.

Size of File

Two tables.

Mode of Dissemination

Typewritten copy.

For-Hire Trucking Survey – Special request tabulations

Source

A sample survey conducted by Statistics Canada.

Universe

For-hire carriers in Canada with earnings of \$100,000 or more from the domestic movement of goods.

Subject Content

Specific points of origin and destination; estimated number of shipments, estimated revenue, tons and ton-miles, tonnes and tonnes-kilometers for any commodity carried at the three-digit Standard Commodity Classification level.

Geographic Coverage

Provinces and territories, municipalities and census subdivisions.

Frequency and Time Span

Annual, from 1970.

Size of File

Approximately six variables.

Massaging of Data

Special manipulations provided.

Mode of Dissemination

Tape or computer printout.

A survey conducted by Statistics Canada.

Universe

Establishments in Canada with annual revenue of \$500,000 and over as recorded in the Passenger Bus and Urban Transit Statistics Survey.

Subject Content

Data on revenue, number of passengers carried, vehicle miles travelled and type of service.

Geographic Coverage

Provinces and territories.

Additional Information

Information on variables such as distance run, passenger revenue earned, fare passengers carried and fuel consumed can be given to users for the provinces of Québec and Ontario.

Frequency and Time Span

Monthly, from 1960.

Size of File

One tabulation.

Mode of Dissemination

Manually produced tables.

53.4**Passenger Bus and Urban Transit Statistics – Off-the-shelf tabulations****Source**

A survey conducted by Statistics Canada.

Universe

All establishments in Canada, with at least one employee, deriving revenue from the transportation of passengers by motor carrier.

Subject Content

Operating revenues, operating expenses, number of employees, fare passengers carried, equipment operated.

Geographic Coverage

Provinces and territories.

Additional Information

Data on provincial and territorial bases can be made available to users provided there are three or more carriers operating in a province.

Frequency and Time Span

Annual, from 1974.

Size of File

Approximately 50 tabulations.

Mode of Dissemination

Computer printout and manually produced tables.

Related Publication

53.5**Motor Carrier, Freight and Household Goods Movers Survey – Special request tabulations****Source**

The Motor Carriers – Freight Survey which covers for-hire trucking establishments primarily engaged in the provision of local and long-distance trucking.

The Household Goods Movers Survey which covers trucking establishments primarily engaged in moving of used uncrated furniture. Both surveys are conducted by Statistics Canada.

Universe

All trucking establishments in Canada with at least one employee and total gross operating revenue of \$100,000 and over.

Subject Content

Data include distance travelled, equipment operated and the number of carriers by type of operation, intercity transportation revenue earned, the area of operation, the type of commodities carried, size, type and area of operation.

Geographic Coverage

All provinces and territories.

Frequency and Time Span

Annual, from 1974.

Size of File

Approximately 500 variables.

Mode of Dissemination

Computer printout and manually produced tables.

Related Publication

53.6**Bus Passenger Origin-Destination Survey – Off-the-shelf tabulations****Source**

A sample survey conducted by Statistics Canada.

Universe

Intercity bus companies operating in Canada.

Subject Content

Origin-destination pairs ranked by estimated number of passengers. Passengers travelling from province of origin to province of destination. Number of passengers by trip distance. Number of passengers by fare category.

Geographic Coverage

Provinces and territories; selected municipalities and selected census subdivisions.

Additional Information

Variables under Subject Content do not appear in Statistics Canada publications.

Frequency and Time Span

Semi-annually, from 1981.

Size of File

Approximately 20 tabulations.

Mode of Dissemination

Computer printout.

53.7**Private Trucking Survey – Special request tabulations****Source**

A survey conducted by Statistics Canada.

Universe

Not-for-hire operators of seven or more trucks, tractors, trailers or vans in Canada.

Subject Content

Industry data, principal commodity carried, area of operation, type of fuel, number of employees, type of trucking service, type of employees, quantity of fuel, number of vehicles, and operating expenses.

Geographic Coverage

Provinces and territories.

Frequency and Time Span

Annual, from 1980–81.

Size of File

Approximately 100 variables.

Mode of Dissemination

Computer printout or manually produced tables.

54**Water Transport****54.1****Coastwise Shipping Survey – Off-the-shelf tabulations****Source**

A survey conducted by Statistics Canada.

Universe

Vessels entering or leaving a Canadian port in coastwise shipping.

Subject Content

Tonnage of cargoes handled; cargoes and commodities loaded and unloaded; origin and destination of cargoes and commodities handled; number and registered net tonnage of vessels or tugs arriving at and departing from Canadian ports.

Geographic Coverage

Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, Québec, Ontario, Manitoba, British Columbia and Northwest Territories.

Additional Information

Variables under Subject Content are available for all ports and all commodities. Only data for certain specific ports and commodities appear in publications listed below.

Frequency and Time Span

Quarterly, from 1981; annual, from 1938.

Size of File

Approximately 25 tabulations.

Mode of Dissemination

Computer printout.

Related Publications

54.2**Marine International Freight Origin and Destination Survey – Off-the-shelf tabulations****Source**

Administrative records of Revenue Canada, Customs and Excise.

Universe

All international shipping vessels entering or leaving Canadian ports, whether in ballast or with cargo.

Subject Content

Since 1980, tables showing cargo tonnes handled at Canadian ports in international shipping are available by up to four variables: commodity, handling port, foreign origin and destination (port or country), nationality of vessel, Canadian region. Totals for one specified variable and subtotals for up to two other variables are generated by the system. The data can be provided in rank order of any one of the first four variables listed above. Vessel activity by port is also available.

Geographic Coverage

By port and region (Canadian).
By foreign port and country.

Additional Information

Many of the cross-tabulations of variables under Subject Content do not appear in any Statistics Canada publication.

Frequency and Time Span

Annual, from 1938. For previous years, the Shipping Report was compiled by Customs Division of Revenue Canada.

Quarterly, from 1979.

Monthly, from 1957 to 1978.

Size of File

Approximately 75 tabulations (since 1980).

Mode of Dissemination

Computer printout; microfiche (since 1980).

Commerce, Construction, Finance and Prices

61 Business Conditions

61.1 Gross Domestic Product (GDP) by Industry in Current and Constant Prices – Special request tabulations

Source

The primary sources of data used to estimate GDP by industry are surveys conducted by Statistics Canada such as annual censuses of mining, agriculture, forestry, manufacturing and construction as well as sample surveys for such industry sectors as retail trade.

Universe

GDP estimates cover all industries and sectors in the Canadian economy. In certain cases the working level (the lowest level of industrial detail within the Industry Product Division measurement system) may represent an aggregation of two or more three- or four-digit (Standard Industrial Classification) industries.

Subject Content

Annual data are available for gross output, intermediate inputs and Gross Domestic Product (value added) in current and constant prices. Monthly and quarterly data are available only for constant price value added.

Geographic Coverage

Monthly, quarterly and annual data are available by industry for Canada. In addition, for selected industries, annual data are available by province.

Frequency and Time Span

Annual constant price series for selected industries (or aggregates) are available from 1935. Annual current price estimates date from 1961 for manufacturing and from 1971 for all other industries. Monthly and quarterly constant price estimates are available for selected industries (or aggregates) from 1919.

Size of File

A maximum of 15 variables for each industry or industry grouping.

Massaging of Data

Selected arithmetic calculations can be supplied.

Mode of Dissemination

Computer printout; selected data are available on magnetic tape or fiche.

Related Publications

Statistics Canada. Industry Product Division. *System of National Accounts, Gross Domestic Product by Industry*. Monthly. Bilingual. Cat. No. 61–005.

61.2 Fixed Capital Stocks – Off-the-shelf tabulations

Source

The Private and Public Investment (Sample) Survey conducted by Statistics Canada.

Universe

For information on universe, please contact the Director of Construction Division at the address listed below.

Subject Content

This file has statistics on fixed capital stocks for manufacturing industries at the three-digit Standard Industrial Classification (SIC) level. Variables include end-year gross stock, mid-year gross stock, end-year net stock and mid-year net stock – all in thousands of current and constant 1971 dollars. The variables are

cross-tabulated by type of expenditure (i.e., construction, machinery or equipment).

Geographic Coverage

Canada and provinces.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1955.

Mode of Dissemination

Tape and computer printout.

Related Publications

Statistics Canada. Construction Division. *Fixed Capital Flows and Stocks*. Annual. Bilingual. Cat. No. 13–211.

61.3

Fixed Capital Flows and Stocks – Off-the-shelf tabulations

Source

The Private and Public Investment (Sample) Survey conducted by Statistics Canada.

Universe

For information on the universe, please contact the Director of Construction Division at the address listed below.

Subject Content

Two subfiles are available. Subfile A contains information on gross fixed capital formation, capital consumption allowances, end-year gross stock, end-year net stock, mid-year gross stock and mid-year net stock – all in thousands of current and constant 1971 dollars. Cross-tabulation is by type of expenditure (i.e., construction, machinery or equipment).

Subfile B has all the variables contained in Subfile A plus net fixed capital formation and discards – all in millions of current and constant 1971 dollars.

Geographic Coverage

Subfile A: all provinces.

Subfile B: Canada only.

Additional Information

The data in Subfile A and the variables, end-year gross stock, end-year net stock and discards in Subfile B do not appear in Statistics Canada publications.

Frequency and Time Span

The data are annual. Subfile A has data from 1955; Subfile B has data from 1926.

Mode of Dissemination

Subfile A is available on tape and computer printout from the National Wealth and Capital Stock Section. Subfile B is available on the CANSIM Time Series Module (matrix numbers 3435 to 3538).

Related Publications

61.4

Financial Institutions – Special request tabulations

Source

A quarterly survey (consisting of sample and census strata) of financial institutions conducted by Statistics Canada.

Universe

All companies classified as financial intermediaries in the Standard Industrial Classification (SIC).

Subject Content

Detailed financial information by industry, including assets, liabilities, revenues, expenses, shareholder equity and retained earnings, is available.

Geographic Coverage

The data are usually available for Canada only; for certain industries, however, some provincial breakdowns are available.

Frequency and Time Span

Quarterly data, the time span varies by industry.

Size of File

Approximately 100 to 200 variables depending upon the industry.

Mode of Dissemination

Typewritten copy.

61.6**Annual Finance Leasing – Special request tabulations****Source**

The Annual Finance Leasing Survey conducted for the Equipment Lessors Association of Canada by Statistics Canada.

Universe

Corporations in the finance leasing business in Canada.

Subject Content

This file contains data on type of lessor, amount of receivables outstanding and amount of business written during year.

Geographic Coverage

Provinces only.

Additional Information

Data on finance lease receivables by province, by type of equipment do not appear in Statistics Canada publications.

Frequency and Time Span

Annual data, from 1973.

Size of File

Approximately 300 variables.

Mode of Dissemination

Typewritten copy.

Related Publications

Statistics Canada. Business Finance Division. *Financial Institutions: Financial Statistics*. Quarterly. Bilingual. Cat. No. 61-006.

61.7**Corporation Financial Statistics – Special request tabulations****Source**

Federal department administrative records and the Corporate Account file (CORPAC) and published accounts of the federal, provincial and territorial governments.

Universe

Corporations filing T2 tax returns and federal and provincial non-taxable crown corporations. The sample, stratified by Standard Industrial Classification (SIC) and asset size, consists of approximately 26,000 corporations from a universe of 413,000. Insurance carriers, credit unions, caisses populaires, foreign business corporations, non-profit corporations and inactive corporations are excluded from the sample; however some data on excluded corporations can be aggregated from the universe on request.

Subject Content

The following items cross-tabulated by SIC code industry group, asset size and sales size: revenue, expenditures, earned surplus and balance sheet data. Financial ratio information is available by SIC and by asset size.

Geographic Coverage

Canada, provinces and Revenue Canada district offices.

Additional Information

Geographic and industry detail additional to that in Statistics Canada publications is available.

Frequency and Time Span

Annual data, from 1965.

Size of File

Approximately 200 variables.

Mode of Dissemination

Tape and computer printout.

61.9**CALURA Corporations – Special request tabulations****Source**

A survey conducted by Statistics Canada under the Corporations and Labour Unions Returns Act (CALURA).

Universe

Business corporations with gross revenues in excess of \$500,000 or assets in excess of \$250,000 (to be amended in 1983).

Subject Content

Details on incorporations such as dates, manner of incorporation, act of incorporation, nature of business, names, addresses and citizenship of directors and officers. Description of the share capital; list of corporations holding 10% or more of the total issued shares of any class along with the number of shares held in each class; list of shareholders with addresses outside Canada or no address of record holding more than 5% of the total issued shares of any class; list of corporate names and addresses with their manner, date and place of incorporation of corporations authorized to do business in Canada in which the reporting corporation holds more than 50% of any class of issued shares; a description of the capital debt of the reporting corporation.

Geographic Coverage

Canada.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Annual, from 1972.

Size of File

Information as above for approximately 70,000 corporations.

Mode of Dissemination

Photocopies of CLR-2 forms.

62**Prices and Consumer Expenditure****62.1****Foreign Service Allowance (Post) Indexes – Off-the-shelf tabulations****Source**

Sequential retail price and living cost sample surveys conducted triennially by foreign service personnel serving at locations outside Canada.

Universe

Retail outlets patronized by Canadian personnel at the post and special local purchasing facilities. The sample excludes goods and services relating to shelter, fuel and utilities and dependants' education.

Subject Content

Comparative spatial retail price indexes of goods and services at a foreign location with prices prevailing in Ottawa.

Geographic Coverage

About 200 posts in foreign countries.

Additional Information

Price comparisons for 16 groups of goods and services at 200 foreign locations are available. The commodity groups include food at home, meals away from home, household supplies and services, clothing, etc.

Frequency and Time Span

Monthly; varies by index.

Size of File

Approximately 130 indexes are on file.

Mode of Dissemination

Typewritten copy.

Related Publication

62.2**Isolated Posts Allowance Indexes – Off-the-shelf tabulations****Source**

Sequential retail price and living cost sample surveys conducted every four to five years (on average).

Universe

Retail outlets at isolated posts.

Subject Content

Comparative spatial retail price indexes for food consumed at home, household supplies and services, personal care supplies and services, transportation, tobacco and alcohol.

Geographic Coverage

Approximately 350 locations in northern Canada that have been designated as isolated.

Additional Information

Price levels at isolated locations are expressed as the ratio (in percentage form) of those at the base city. Base cities are St. John's, Montréal, Toronto, Winnipeg, Saskatoon, Edmonton and Vancouver. Only "all items" indexes are made available to users.

Frequency and Time Span

Every four to five years.

Size of File

Approximately 350 indexes are currently on file.

Mode of Dissemination

Typewritten copy.

62.3**Survey of Family Expenditures – Microdata****Source**

The sample Survey of Family Expenditures conducted by Statistics Canada.

Universe

Spending units living in private dwellings in all areas of Canada excluding Indian reserves and the Yukon and Northwest Territories.

Subject Content

This file provides summaries of family expenditure for the following broad categories: food, shelter, household operation, household furnishings and equipment, clothing, personal care, medical and health care, tobacco and alcoholic beverages, transportation, recreation, reading, education and miscellaneous expenses. In addition some expenditure detail is available for the shelter, household furnishings and equipment categories.

The file also presents the income of spending units, and the age, sex and marital status of spending unit, head and spouse. The characteristics of dwellings occupied by the spending unit on December 31, 1978, are also given.

Geographic Coverage

Codes are given for regions; and size of area of residence categories: including urban areas of 100,000 population or more, 30,000 to 99,999 population and less than 30,000 population; and rural farm or rural non-farm status.

Frequency and Time Span

The data are available for the 1978 calendar year only.

Size of File

9,356 records

Mode of Dissemination

Tape only.

Reference Materials

Extensive documentation is supplied with the tape, including a questionnaire facsimile and a description of each variable.

62.4**FAMEX '78 Full Tables – Off-the-shelf tabulations****Source**

The sample Survey of Family Expenditures conducted by Statistics Canada.

Universe

Spending units living in private dwellings in all areas of Canada excluding Indian reserves and the Yukon and Northwest Territories.

Subject Content

The tabulations in this file supply full detail for family expenditures within each of the following categories: food, shelter, household operation, household furnishings and equipment, clothing, personal care, medical and health care, tobacco and alcoholic beverages, transportation, recreation, reading, education and miscellaneous expenses.

Geographic Coverage

Canada; regions (British Columbia, Prairie Provinces, Ontario, Québec and Atlantic Provinces); 16 cities as a group (St. John's, Charlottetown, Summerside, Halifax, Saint John, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vancouver).

Additional Information

These tabulations are detailed versions of tabulations appearing in the publications below.

Frequency and Time Span

The data are available for the 1978 calendar year.

Similar sets of tabulations with variable geographic coverage exist for 1976, 1974, 1972, 1969, 1967 and 1964.

Size of File

70 tabulations.

Mode of Dissemination

Computer printout, microfiche and tape.

62.5**FAMEX '78 Full Master File (re-organized) – Special request tabulations****Source**

The sample Survey of Family Expenditures conducted by Statistics Canada.

Universe

Spending units living in private dwellings in all areas of Canada excluding Indian reserves and the Yukon and Northwest Territories.

Average expenditure and percentage reporting are usually suppressed for items reported by less than 30 spending units.

Subject Content

This file supplies full detail for family expenditures within each of the following categories: food, shelter, household furnishings and equipment, clothing, personal care, medical and health care, tobacco and alcoholic beverages, transportation, recreation, reading, education and miscellaneous expenses.

In addition, the income of spending units, and the income age, sex and marital status of spending unit head and spouse are included. The characteristics of the dwelling occupied by the spending unit on December 31, 1978, are also given.

Geographic Coverage

Provinces, and urban and rural areas (including selected cities).

Frequency and Time Span

The data are available for the 1978 calendar year.

Similar data bases with variable geographic coverage exist for 1976, 1974, 1972, 1969, 1967 and 1964.

Size of File

Over 1,000 items of expenditure plus characteristics of the spending unit.

Mode of Dissemination

Computer printout, microfiche and tape.

63.2 Retail Chain Master and Location Files – Special request tabulations

Source

The annual chain and department store sample survey conducted by Statistics Canada.

Universe

All known companies operating four or more locations under the same legal ownership in the same kind of business.

Subject Content

This file supplies data on the value of retail sales, the number of locations and floor area for retail chain organizations.

Geographic Coverage

Provinces and census metropolitan areas.

Frequency and Time Span

Annual data, from 1979.

Size of File

Four variables are available for each company.

Mode of Dissemination

Computer printout.

63.3**Ottawa-Hull Weekly Department Stores Sales Report – Off-the-shelf tabulations****Source**

A survey of all department store locations in the Ottawa-Hull census metropolitan area (CMA) conducted by Statistics Canada.

Universe

Department stores in the Ottawa-Hull CMA.

Subject Content

Data are available on the value of sales and the percentage change in sales from the previous year for surveyed department stores.

Geographic Coverage

Ottawa-Hull CMA only.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Weekly data, from 1974.

Size of File

One tabulation weekly.

Mode of Dissemination

Typewritten copy.

Related Publication

63.4**Merchandising Businesses Survey: Wholesale Merchants – Special request tabulations****Source**

For 1973 to 1979, data are derived from a biennial census survey. From 1981 on, data for large and

medium size establishments are derived from a sample survey and, for small establishments, from administrative records. (Surveys conducted by Statistics Canada.)

Universe

Wholesale merchants and wholesale establishments operating in Canada.

Subject Content

Data on wholesale merchants and wholesale establishments include: form of organization, kind of business, type of operation, percentage sales by class of customer, source of revenue and value of goods bought and sold on commission, purchases, opening and closing inventories, wages and salaries, and volume of trade for individual trading locations.

Geographic Coverage

Provinces. The Yukon and Northwest Territories are included with British Columbia.

Frequency and Time Span

Biennial data, from 1973 to 1979. Annual data, from 1981.

Size of File

Approximately 10 variables.

Mode of Dissemination

Computer printout only.

64**Construction and Housing****64.1A****Household Income, Facilities and Equipment – Microdata****Source**

The linked sample surveys of Household Facilities and Equipment and Consumer Finances conducted by Statistics Canada.

Universe

Private households in Canada, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

Data items include: dwelling characteristics such as type of dwelling, period of construction, number of rooms and number of bedrooms; household facilities such as heating equipment and fuels used for space heating, water heating and cooking, type of washing machine and dryer, and number of selected appliances (televisions, radios, passenger cars, etc.); presence of recreational equipment such as bicycles, skis, camping equipment and boats; four component sources of household income and primary family income plus the total income of head of household and wife; household and primary family characteristics such as number of members, number of children, composition; personal and labour-related characteristics of head of household and wife, including age, education, occupation and mother tongue; and monthly rent at the time of the survey (except for 1978).

Geographic Coverage

Codes are given for provinces and four size of area of residence categories with the following populations: 100,000 or more, 30,000 - 99,999, urban less than 30,000, and rural areas.

Frequency and Time Span

Biennial data, from 1972. Household facilities and equipment are those present at the time of the survey. Income is that received in the previous calendar year.

Size of File

1980 35,337 records.
1978 34,791 records.
1976 21,130 records.
1974 24,545 records.
1972 18,616 records.

Mode of Dissemination

Tape only.

Reference Materials

Extensive documentation is provided with each tape, including a questionnaire facsimile, a description of each variable and the record layout.

64.1B**Household Income, Facilities and Equipment – Special request tabulations****Sources**

The linked sample surveys of Household Facilities and Equipment and Consumer Finances conducted by Statistics Canada.

Universe

Private households in Canada, excluding the Yukon, the Northwest Territories and Indian reserves.

Subject Content

Data items include: dwelling characteristics such as type of dwelling, period of construction and number of rooms; household facilities such as heating equipment and fuels used for space heating, water heating and cooking, type of washing machine and dryer, and number of radios, televisions and passenger cars; presence of recreational equipment such as bicycles, skis, camping equipment and boats; 16 component sources of household income, and primary family incomes and family members' incomes; household and primary family characteristics such as number of persons, number of children and composition; personal and labour-related characteristics of household members such as age, sex, education, occupation and weeks worked; and monthly rent at the time of the survey.

Geographic Coverage

Provinces and five size of area of residence categories: 500,000 population and over, 100,000 – 499,999 population, 30,000 – 99,999 population, urban under 30,000 population and rural. Specific large urban areas can be tabulated separately or in groups depending on their sample size.

Frequency and Time Span

Biennial data, from 1972. Household facilities are those present at the time of the survey. Income is that received the preceding calendar year.

Size of File

The file contains data on 35,387 households in 1980, 34,828 in 1978, 21,151 in 1976, 24,585 in 1974 and 18,663 in 1972. For each household approximately 100 variables are available for cross-classification.

Massaging of Data

A variety of services are available, including data transformations and regressions.

Mode of Dissemination

Computer printout and tape.

Reference Materials

Record layouts, lists of variables and codes are provided upon request. Survey questionnaires are printed in the catalogued publications listed below.

64.1C**Household Income, Facilities and Equipment – Off-the-shelf tabulations****Sources**

The linked sample surveys of Household Facilities and Equipment and Consumer Finances conducted by Statistics Canada.

Universe

Private households in Canada, excluding the Yukon, Northwest Territories and Indian reserves.

Subject Content

The same table formats as in *Household Facilities by Income and Other Characteristics*, Cat. No. 13-567, except percentage distributions are by income groups

instead of within income groups. Variables relate to characteristics of the dwelling and various facilities and equipment present.

Geographic Coverage

Regions and four size of area of residence categories: over 100,000 population, 30,000 to 99,999 population, urban under 30,000 population and rural.

Frequency and Time Span

Biennial data, from 1980. Household facilities are those present at the time of the survey. Income is that received the preceding calendar year.

Size of File

1982 11 tabulations.

1980 11 tabulations.

Mode of Dissemination

Computer printout only.

64.2**Census of the Construction Industry – Special request tabulations****Source**

All firms with gross business income (GBI) over \$500,000 are surveyed annually. For firms with GBI under \$500,000, use is made of administrative records (financial statements attached to tax returns) from Revenue Canada supplemented by a sample survey.

Universe

Construction establishments.

Subject Content

Variables include: year; company number; legal entity; size; industry; type of construction and type of work codes, percentages and dollars; accounting method; total operating construction and other revenues; other revenue codes; operating or direct costs such as subcontracts, materials, wages, salaries, land, repairs to machinery and equipment and other; overhead costs such as salaries, bad debts, repairs to buildings, gas and oil and utilities; operating profit or loss; earnings and withdrawals; capital expenditures – construction, machinery and equipment;

man hours worked; number of salaried employees; number of owners and partners; total assets, current assets including fixed assets and other; total liabilities including current and long term; and equity.

Geographic Coverage

Provinces including the Yukon and the Northwest Territories.

Frequency and Time Span

Annual data, from 1977.

Size of File

Approximately 35 variables.

Mode of Dissemination

Tape and computer printout.

Reference Materials

If a tape is issued, the record layout is supplied by the Construction Census Section.

64.3**Residential Capital Stock – Off-the-shelf tabulations****Source**

The data are derived from a number of Statistics Canada sample surveys, including the Building Permits Survey and the Survey of Housing Starts and Completions.

Universe

All residential assets in Canada. Residential capital stock includes all non-collective dwellings, private and public, mobile homes, conventionally built structures and related items, such as non-movable equipment installed in residential buildings, and outbuildings such as garages and swimming pools. Expenditures for major alterations and improvements are also capitalized. The estimates are not the result of direct surveys, but are statistically derived from various data sources.

Subject Content

Data are supplied, in current and constant 1971 dollars, on the value of residential real estate in Canada: gross fixed capital formation, capital cost allowances (demolitions, fire damage and depreciation), net and gross capital stock at mid year and year end.

Geographic Coverage

Canada, provinces and territories.

Frequency and Time Span

Annual data: for Canada, from 1926; for provinces and territories, from 1941.

Size of File

Two tables: Gross and net capital stock, Canada only, and net capital stock by province.

Mode of Dissemination

Computer printout only.

The data should be on CANSIM by December 1984.

Reference Material

Residential Capital Stock and Flows: Methodology. Available upon request from the Housing and Building Permits Section.

Related Publication

Statistics Canada. Construction Division. *Fixed Capital Flows and Stocks*. Annual. Bilingual. Cat. No. 13-211. (Contains data on residential capital stock at the Canada level.)

64.4**Historical Building Permits Series – Off-the-shelf tabulations****Source**

Administrative records of municipalities.

Universe

Canadian municipalities that issue building permits for residential and non-residential building construction.

Subject Content

Data are supplied on the number and type of new dwellings authorized: singles, cottages, doubles, row houses, apartments and conversions. In addition, the value, in current dollars, of residential, industrial, commercial, governmental and institutional construction is provided.

Geographic Coverage

Provinces, census metropolitan areas, census divisions, municipalities and economic regions for Québec, Ontario and Manitoba.

Additional Information

Residential permits for provinces and census metropolitan areas, showing the number and value of construction by type of structure (singles, cottages, doubles, row, apartments, conversions, swimming pools, garages, improvements), 1964 to 1977 inclusive.

Frequency and Time Span

Annual data, from 1957–77; additional detail from 1964.

Size of File

Seven tabulations.

Mode of Dissemination

Computer printout.

Reference Materials

Definitions of concepts and classifications used are available in the Introduction of Cat. No. 64–001 listed below.

65**External Trade****65.1****Canadian Merchandise Trade – Special request and off-the-shelf tabulations****Source**

Administrative records of federal government departments.

Universe

Canada's imports and exports; that is all goods adding to or subtracting from the stock of material resources in Canada as a result of their movement across the Canadian border.

Subject Content

This file contains data on Canada's imports and exports. Cross-classification is by commodity, by country (including the United States by state), by region, by province, by port, by mode of transport and (for imports only) by tariff item.

Geographic Coverage

Foreign countries, Canadian provinces and customs ports.

Additional Information

Off-the-shelf tabulations include import commodity detail formerly carried in Cat. No. 65–207 (see under Related Publications below).

Frequency and Time Span

The statistics for most data variables are available monthly from 1966. Quarterly and annual aggregations are also available for the same period.

Size of File

Special request: Approximately 10 variables.
Off-the-shelf: Approximately 16,000 import commodities.

Mode of Dissemination

Tape, microfiche or computer printout. Some data variables are also available on the CANSIM Time Series Module (matrix numbers 000011, 000012, 000021, 000022, 000203, 000204, 000876 to 000879, 003652 to 003682 and 003686 to 003719).

Reference Materials

66 International Travel

66.1 Travel Between Canada and Other Countries: Demographic and Trip Characteristics – Special request tabulations

Source

A survey conducted at the border on a sample basis by Statistics Canada in co-operation with Customs and Excise.

Universe

International travelling public crossing the Canadian borders, made up of residents of Canada and other countries.

Subject Content

Province visited or province of residence; data are available for the individual Atlantic Provinces.

Purpose of Trip: some purposes of trip have been grouped for publication but are available individually as listed on the survey questionnaires (1974).

U.S. Visitors – state data are available for each individual state (1974).

Canadian overseas travellers characteristics are available for direct and via the U.S. re-entries separately (1974).

Canadian overseas person data can be given separately for Central America; Bermuda and Caribbean (total); St. Pierre and Miquelon; Mexico; Oceania (total) (1974).

Canadian overseas country visits (same day and one or more nights) data are available from 1973 to 1978.

Overseas visitors – 1974–1976 most travellers characteristics data are available for direct and via the U.S. (excluding same day land traffic entries separately. Beginning in 1977 travellers characteristics data are available only on the basis of same day (including land traffic) and one or more nights.

Overseas visitors country of residence, expenditure and nights stay data are available for the main European countries individually (1974).

Overseas visitors since 1977 travellers characteristics data (with the expenditures by province visited in 1977 and 1978) are available for all the main European countries; South Africa; total all other Africa; China; Hong Kong; Israel; Japan; Lebanon; Taiwan; all other Asia; Bermuda; total West Indies; total Central America; total South America; Australia; New Zealand; total other Oceania and other ocean islands; Greenland; Mexico; St. Pierre and Miquelon.

Canadians visiting the U.S. and U.S. visitors to Canada – same day persons by type of transportation, quarterly, are available (1979–1981).

Geographic Coverage

All provinces and territories.

Frequency and Time Span

See subject content.

Size of File

Approximately 12 variables.

Massaging of Data

Occasional manipulations provided.

Mode of Dissemination

Tabulation worksheets and computer printout.

Government Finance

68.1A

Perpetual Inventory Local Government Long Term Debt (PILODET) – Special request tabulations

Source

Administrative records and individual debt issue data supplied by provinces and issuing agencies.

Universe

Municipalities, school boards, local government agencies and enterprises in all provinces except Ontario and Québec.

Subject Content

Data on debenture and other long term debt such as amount, interest rate, currency, repayment schedule, purpose and balances outstanding by individual issue for each local unit.

Geographic Coverage

Municipalities, school boards, enterprises, etc. in provinces other than Ontario and Québec.

Frequency and Time Span

From 1982 to date of debt issue. File is updated monthly and annually.

Size of File

Approximately eight variables.

Mode of Dissemination

Tape and computer printout.

Reference Materials

Set of definitions can be provided.

68.1B**Perpetual Inventory Local Government Long
Term Debt (PILODET) – Off-the-shelf tabulations****Source**

Administrative records and individual debt issue data
supplied by provinces and issuing agencies.

Universe

Municipalities and census metropolitan areas (CMAs) in
all provinces except Ontario and Québec.

Subject Content

Aggregated data on long term debt such as term,
interest rate, lender, purpose, outstanding balances,
interest/principal payments, forecasts of repayment
schedules, etc.

Geographic Coverage

By province (except Ontario and Québec), municipality,
CMA, school enterprises and any areas defined in the
Standard Geographic Classification.

Additional Information

These tabulations provide greater detail than contained in
Statistics Canada publications.

Size of File

Approximately 20 tabulations reflecting aggregations of
long term debt data.

Mode of Dissemination

Computer printout.

Reference Materials

Specifications and definitions can be provided.

Employment, Unemployment and Labour Income

71 Labour Force

71.1A Labour Force Survey – Microdata

Source

Monthly Labour Force Survey (sample) conducted by Statistics Canada.

Universe

Individuals, 15 years and over, living in the 10 Canadian provinces, excluding native population living on reserves, inmates of institutions, persons whose usual place of residence is outside of Canada and full-time members of the armed forces.

Subject Content

Demographic variables (such as age, sex, marital status, family relationships, education) and labour market activities (such as employment status, hours worked, job tenure, industry, occupation, school attendance, time lost, job search activities, type of work sought, duration of joblessness, unemployment, job termination details).

Geographic Coverage

Canada, provinces and regions.

Frequency and Time Span

Monthly, from 1975 to the present.

Size of File

120,000 non-identifiable respondent records.

Mode of Dissemination

Tape only.

Reference Materials

File layouts available on request; 6,250 BPI tape is used; 1,600 BPI tape is available on request.

71.1B Labour Force Survey – Special request tabulations

Source

Monthly Labour Force Survey (sample) conducted by Statistics Canada.

Universe

Individuals, 15 years and over, living in the 10 Canadian provinces, excluding native population living on reserves, inmates of institutions, persons whose usual place of residence is outside of Canada and full-time members of the armed forces..

Subject Content

Labour Force Survey variables such as age, sex, marital status, educational attainment etc. and some derived data such as duration of unemployment, job tenure and joblessness. Data weighted to provincial age and sex estimates from the census.

Geographic Coverage

Canada, provinces and regions. Census metropolitan areas and economic regions also available subject to release restrictions.

Additional Information

Unreliable estimates are suppressed.

Frequency and Time Span

Monthly and annual from 1966 but not all variables exist prior to 1975.

Size of File

Approximately 120 variables.

Massaging of Data

Some manipulations provided on request.

Mode of Dissemination

Tape, computer printout, microfilm or microfiche.

71.2**Labour Force Historical – Off-the-shelf tabulations****Source**

Monthly Labour Force Survey (sample) conducted by Statistics Canada.

Universe

Individuals, 15 years and over, living in the 10 Canadian provinces, excluding native population living on reserves, inmates of institutions, persons whose usual place of residence is outside of Canada and full-time members of the armed forces..

Subject Content

Data pertaining to the characteristics of the labour force such as industry, age, sex, and labour force activities.

Geographic Coverage

Canada, provinces and regions.

Additional Information

Unreliable estimates are suppressed. More detail is available from 1975 (revised Labour Force Survey).

Frequency and Time Span

Monthly and annual averages from 1966 to 1983. Not all series are available back to 1966.

Size of File

Computer printout: approximately 100 tabulations.
Microfiche: approximately 135 tabulations.

Massaging of Data

Some manipulations provided on request.

Mode of Dissemination

Microfiche from 1975; computer printout from 1961; some series available on CANSIM.

Reference Materials

71.3**CALURA (Labour Unions) Industry Ledger – Special request tabulations****Source**

A survey conducted by Statistics Canada under the Corporations and Labour Unions Returns Act (CALURA).

Universe

All labour unions having a local or branch in Canada comprising 100 or more members resident in Canada.

Subject Content

Male and female union memberships by province and by major industry group, with the corresponding number of paid workers.

Geographic Coverage

All provinces.

Frequency and Time Span

Annual data, from 1975.

Size of File

Approximately 12 variables.

Mode of Dissemination

Worksheets only.

71.4**Survey of 1981 Work History – Microdata****Source**

A supplementary survey (sample) to the Canadian Labour Force Survey conducted by Statistics Canada.

Universe

The civilian non-institutionalized residents of Canada, 15 years and over, excluding residents of the Yukon, Northwest Territories and Indian reserves.

Subject Content

For persons 15 years of age or older, data are shown for the industry, occupation, class of worker and months worked for up to four different employers. Where a respondent was a paid worker, data are presented on work schedule, wage rate, reasons for working variable hours, union membership and desire for additional hours (part-time employees only). Standard demographic variables are shown for each respondent.

Geographic Coverage

Provinces only.

Frequency and Time Span

A one-time survey, January 1982 data.

Size of File

158,316 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology and the guidelines for the release of the data is supplied to users.

Related Publication

71.5**Survey on Absence from Work – Microdata****Source**

A supplementary survey (sample) to the Canadian Labour Force Survey conducted by Statistics Canada.

Universe

The civilian non-institutionalized residents of Canada, 15 years and over, excluding residents of the Yukon, Northwest Territories and Indian reserves.

Subject Content

Data are available on absence from work for health-related reasons including the number of absences, the duration and the type of compensation received. Standard demographic variables are shown for each respondent, 15 years of age and older.

Geographic Coverage

Provinces only.

Frequency and Time Span

Annual data, from 1976.

Size of File

57,269 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology and the guidelines for the release of data is supplied to users.

71.6**Survey of Annual Work Patterns – Microdata.****Source**

A supplementary survey (sample) to the Canadian Labour Force Survey conducted by Statistics Canada.

Universe

The civilian non-institutionalized residents of Canada, 15 years and over, excluding residents of the Yukon, Northwest Territories and Indian reserves.

Subject Content

This survey provides information on the length and timing of periods of employment, unemployment and absence from the labour force; the duration and timing of periods of full-time school attendance; and the reasons for engaging or not engaging in certain labour force activities. Standard demographic variables are shown for each respondent, 15 years of age and older.

Geographic Coverage

Provinces and major metropolitan areas.

Frequency and Time Span

Annual data, from 1977.

Size of File

100,371 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology and the guidelines for the release of the data is supplied to users.

71.7**Survey of Job Opportunities – Microdata****Source**

A supplementary survey (sample) to the Canadian Labour Force Survey conducted by Statistics Canada.

Universe

The civilian non-institutionalized residents of Canada, 15 years and over, excluding residents of the Yukon, Northwest Territories and Indian reserves.

Subject Content

Data are available on the participation pattern of persons inactive due to labour market conditions or their own

preference; the desired participation patterns of persons inactive due to labour market conditions and their own preferences; the type of work desired by such individuals and the offered employment opportunities; those persons who have become discouraged looking for work and believe that no suitable jobs are available; and those persons who are seriously interested in having a job, be it part-time, full-time, permanent or temporary. Standard demographic variables are shown for each respondent, 15 years of age and older.

Geographic Coverage

Provinces only.

Frequency and Time Span

Annual data, from 1979.

Size of File

54,050 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology and the guidelines for the release of data is supplied to users.

72

Employment and Earnings

72.1

Monthly Survey of Employment, Payrolls and Hours – Special request tabulations

Source

A Statistics Canada sample survey.

Universe

Large and small firms (establishments) in Canada for all industries except agriculture, fishing and trapping, private households, religious organizations and defence.

Subject Content

Data variables are number of employees (total, hourly rated and salaried), average weekly earnings (including and excluding overtime), average weekly hours and weekly overtime hours, and average hourly earnings and hourly overtime earnings.

Geographic Coverage

Canada, provinces and territories, economic regions (Québec and Ontario), census metropolitan areas and census divisions.

Additional Information

Variables are available by three-digit Standard Industrial Classification subject to confidentiality provisions.

Frequency and Time Span

Monthly, starting from March 1983.

Size of File

Approximately 15 variables.

Massaging of Data

Occasional manipulations provided.

Mode of Dissemination

Manually produced tables; CANSIM.

Related Publication

72.2

Monthly Survey of Employment, Payrolls and Hours (large firms) – Special request tabulations

Source

A Statistics Canada survey of all firms having 20 or more employees.

Universe

Establishments in Canada of commercial industries except agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households, public administration and defence.

Subject Content

Employment (employment index, total all employees, salaried employees, wage earners and wage earners with hours only); average weekly earnings for all employees, salaried and wage earners; average weekly hours for wage earners with hours only; and average hourly earnings for wage earners with hours only. Selected employment, earnings and hours series are seasonally adjusted.

Geographic Coverage

Canada, provinces and territories, economic regions (in Québec and Ontario), census metropolitan areas and census divisions.

Additional Information

Variables under subject content are available in greater geographical and industry (three-digit Standard Industrial Classification) detail than is included in Statistics Canada publications.

Frequency and Time Span

Monthly, from 1961 to March 1983. From April 1983, a revised survey (stratified sample and census) covering all sizes of firm provides similar detail.

Size of File

Approximately 15 variables.

Massaging of Data

Occasional manipulations provided.

Mode of Dissemination

Manually produced tables.

72.3 Estimates of Employees by Province and Industry – Special request tabulations

Source

Various Statistics Canada surveys.

Universe

Large and small firm establishments in Canada that cover all industries except agriculture and the military personnel component of national defence.

Subject Content

Number of employees by industry group for larger firms (having 20 or more employees) and small firms (up to 19 employees) separately by province.

Geographic Coverage

Canada, provinces and territories.

Additional Information

Breakdowns are provided by industry for commercial industries in greater detail than in Statistics Canada publications. Estimates are also available for the non-commercial industries (such as education, hospitals, etc.), public administration (federal, provincial and local) and defence (non-military personnel).

Frequency and Time Span

Monthly, from 1961 to date.

Size of File

Approximately 15 variables.

Mode of Dissemination

Computer printout.

72.4 Local Government Employment and Payrolls – Special request tabulations

Source

Local Government Employment and Payroll Survey (stratified sample and census) conducted by Statistics Canada.

Universe

All municipalities with 10,000 population and over and a sample of those with less than 10,000 population in the monthly survey. In the annual survey, full coverage of municipalities with 5,000 population and over and a sample of those with less than 5,000.

Subject Content

Number of full-time and part-time employees, gross payrolls, Standard Industrial Classification (SIC) classes, and Standard Geographical Classification (SGC) codes.

Geographic Coverage

All provinces, census metropolitan areas, census agglomerations, municipalities and population size groups.

Additional Information

Employment and payroll data by geographic, industry and other detail are not available in Statistics Canada publications. Individual municipality data are subject to confidentiality considerations.

Frequency and Time Span

Annual and monthly, from 1966.

Size of File

Approximately eight variables.

Mode of Dissemination

Computer printout.

Reference Material

73 Unemployment Insurance

73.1 Unemployment Insurance Data – Off-the-shelf and special request tabulations

Source

Beneficiary data from Canada Employment and Immigration Advisory Council.

Universe

All individuals in Canada receiving unemployment insurance benefits in a particular week of the month.

Subject Content

Tabulations by benefit type, age and sex are available.

Geographic Coverage

Off-the-shelf tabulations: provinces, census divisions and federal electoral districts.

Special request tabulations: postal code groupings (user defined).

Additional Information

None of the information on this file appears in Statistics Canada publications.

Frequency and Time Span

Off-the-shelf tabulations: monthly data, from April 1978.
Special request tabulations: monthly data, from January 1982.

Size of File

Off-the-shelf: one tabulation.
Special request: approximately seven variables.

Mode of Dissemination

Computer printout only.

74 Employee Benefit Plans

74.1A Pension Plans in Canada – Off-the-shelf tabulations

Source

A Statistics Canada survey and administrative records of provincial and federal departments.

Universe

All employer-sponsored pension plans in Canada.

Subject Content

Number of plans, membership by sex and amount of contributions at a greater detail than included in Statistics Canada publications.

Geographic Coverage

Canada and provinces except Newfoundland, Prince Edward Island and British Columbia.

Additional Information

Detail on special and early retirement ages, disability conditions and benefits, postponed and compulsory retirement.

Frequency and Time Span

1970 and biennial from 1974.

Size of File

Approximately 1,000 tabulations.

Mode of Dissemination

Computer printout and microfilm printout.

Education, Culture, Health and Welfare

81 Education

81.1 Elementary/Secondary Teachers System – Special request tabulations

Source

Provincial records and teachers' reports.

Universe

Teachers, full-time and part-time, employed by school boards in all provinces except Québec; teachers in the Yukon, Northwest Territories and Department of National Defence (DND) schools are also included.

Subject Content

The data variables for teachers are: sex, age, teaching level, staff position, employment status, certification, specialization, teaching experience, degrees held, salary and recruitment source.

Geographic Coverage

School districts (groups of three or more only).

Frequency and Time Span

Annual data, from 1970–71. For certain provinces and years not all data elements are available.

Size of File

Approximately 250 variables.

Mode of Dissemination

The Elementary/Secondary Education Section provides data from this file on computer printout only. The data are also available on the CANSIM Cross-Classified Module (table 00570101 contains teacher and enrolment data and numbers 00570401 to 00570403 contain teacher data only).

Reference Materials

Elementary/Secondary Teachers System User's Manual; This document describes the file content, coding tables for each field, standard table heading sets and availability of data variables by province and year.

81.2 Elementary/Secondary and Minority Language Enrolments – Special request tabulations

Source

Administrative records supplied by elementary and secondary schools.

Universe

Public schools operated by school boards in Canada.

Subject Content

This file has data on total enrolment by age and sex and by grade and sex; French program enrolments by grade and sex; and number of schools by French program offered.

Geographic Coverage

Provinces, school districts and schools.

Frequency and Time Span

Annual data, from 1979.

Size of File

Approximately 150 variables.

Mode of Dissemination

The Postsecondary Education Section provides data from this file on tape or computer printout. The data are also available on the CANSIM Cross-Classified Module – table numbers 00570101 (contains teacher and enrolment data), 00570303 and 00570201 to 00570204.

81.3**Postsecondary Students Survey – Microdata and special request tabulations****Source**

A sample survey conducted by Statistics Canada for the Secretary of State.

Universe

Postsecondary students.

Subject Content

Variables include program of study, duration of course, type of qualification (certificate, diploma or degree), reason for choosing program, reasons for selecting institution, and activity last year. Personal data on and financial characteristics of individuals surveyed are also given.

Geographic Coverage

Provinces only.

Frequency and Time Span

A one-time survey; data are available for 1974 – 75 only.

Size of File

Microdata: 26,223 records.

Special request tabulations: approximately 150 variables.

Mode of Dissemination

Microdata: tape only.

Special request tabulations: computer printout only.

Reference Materials

A coding manual, the record layout and a questionnaire facsimile are available upon request from the Postsecondary Education Section.

81.5**University Student Information System –
Special request tabulations****Source**

Administrative records of individual students attending universities.

Universe

All full-time and part-time students enrolled in the fall of each academic year. All degrees granted during a calendar year.

Subject Content

Program information includes level of registration (undergraduate, graduate, bachelor, doctorate, etc.), type of attendance (full- or part-time), major field of study, years of study, duration of program and type of session (semester, quarter, etc.). Student information includes age, sex, marital status, mother tongue, citizenship and province of residence.

Geographic Coverage

Provinces and universities.

Additional Information

This file provides more detail than contained in Statistics Canada publications.

Frequency and Time Span

Degrees information: annual data, from 1970.

Enrolment information: annual data, from 1972–73.

Prior to these years, data is available in published form only.

Size of File

Approximately 45 variables.

Mode of Dissemination

The Postsecondary Education Section provides data from this file on computer printout only. Some data are also available on the CANSIM Cross-Classified Module (table numbers 00580101 to 00580105).

81.8**Highly Qualified Manpower Survey – Microdata and special request tabulations****Source**

A sample survey conducted by Statistics Canada in 1973 of university graduates identified in the 1971 Census of Canada.

Universe

All degree-holders in Canada in 1973.

Subject Content

Information on sex, field of study, type of degree (B.A., B.Sc., etc.), current job status (by occupation and industry) and province of work is given. In addition, information on employment history such as most recent job, job of longest duration and job at age 30 is also provided.

Geographic Coverage

Provinces only.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

A one-time survey, 1973 data.

Size of File

Approximately 130 variables.

Mode of Dissemination

Microdata: tape only.

Special request tabulations: computer printout only.

Reference Materials

If a tape is issued, the record layout and appropriate documentation will be supplied upon request.

81.9**Annual Survey of Doctoral Degree Recipients –
Special request tabulations****Source**

A Statistics Canada census of doctoral degree recipients (PhDs).

Universe

All students completing the requirements for a PhD degree in a specific calendar year.

Subject Content

This file has information on the socio-economic characteristics of doctoral degree recipients, their educational background and experience, their employment experiences and their employment expectations. Data elements include: age, sex, postgraduation plans, expected areas of employment, degree titles, degree major field of study (PhD degree and all other degrees), institution awarding degree (PhD degree and all other degrees), year study started and degree obtained (PhD degree and all other degrees), length of study of PhD program, sources of financial support during doctoral program, sources of postdoctoral fellowships, type of occupation, employer, place of work, expected income, citizenship, reasons for leaving country, family status, place of birth and mother tongue.

Geographic Coverage

Provinces and universities.

Frequency and Time Span

Annual data, from 1981.

Size of File

Approximately 40 variables.

Mode of Dissemination

Computer printout only.

Related Publications

81.10**Annual College Educational Staff System –
Special request tabulations****Source**

A Statistics Canada census of full-time educational staff employed by colleges and public trade schools.

Universe

Colleges and public trade schools.

Subject Content

Data elements detailing selected personal and professional characteristics of faculty in colleges and public trade schools are given. Variables include age, sex, year of appointment to staff, province and activity of faculty prior to appointment to staff, latest certificate, class step and level, year of appointment to latest certificate level, mother tongue, official language capabilities, previous year salary, previous year staff position, previous year type of program taught and age range, field of principal subject taught, type of program taught, current salary, highest earned degree, years of teaching experience, years of experience in present institution and years on staff in present institution.

Geographic Coverage

All provinces except Québec. Not all data elements are available for all provinces.

Frequency and Time Span

Annual data, from 1976.

Size of File

Approximately 40 variables.

Mode of Dissemination

The Postsecondary Education Section provides data from this file on computer printout only. The data are also available on the CANSIM Cross-Classified Module (table numbers 00580301 to 00580302).

81.11**Universities Academic Staff Survey – Special request tabulations****Source**

Administrative records supplied by universities.

Universe

Full-time teachers at universities.

Subject Content

Teacher information: sex, year of birth, citizenship, rank (lecturer, associate professor, etc.), qualifications, current salary, year appointed to current teaching position, type of appointment (tenured or non-tenured) and number of months on sabbatical.

Geographic Coverage

All regions except the Atlantic provinces.

Frequency and Time Span

Annual data, from 1971.

Size of File

Approximately 25 variables.

Mode of Dissemination

The Postsecondary Education Section provides data from this file on computer printout only. The data are also available on the CANSIM Cross-Classified Module (table numbers 00580201 to 00580202).

81.12**Students Registered in Apprenticeship Programs – Off-the-shelf tabulations****Source**

Administrative records of apprenticeship registrations provided by provincial departments of labour.

Universe

All students registered in provincial apprenticeship programs.

Subject Content

Annual figures are provided on the number of students registered in provincial apprenticeship programs at the beginning of the year; the total number registered during the year; the number of students quitting the program; the number still registered at the end of the year who have passed the interprovincial standards examination, and those who have not; and the number of certificates granted. Cross-classification is by trade group.

Geographic Coverage

Provinces only.

Additional Information

None of the information in this file appears in Statistics Canada published reports.

Frequency and Time Span

Annual data, from 1976.

Size of File

Ten tables.

Mode of Dissemination

Typewritten copies.

82 Public Health

82.1 Hospitals and Mental Institutions Patient Morbidity – Off-the-shelf and special request tabulations

Source

Patient admission/separation forms completed by hospitals.

Universe

All general and allied special hospitals and mental and psychiatric institutions in Canada.

Subject Content

Data include number of separations by province, sex and age group; morbidity rates per 100,000 population; days of in-patient care; days of in-patient care per 100,000 population; and average days of care. These elements are cross-classified by some 1,000 medical codes for morbidity, surgical procedures and treatment set out by the International Classification of Diseases. Data on deaths in hospitals, secondary diagnosis, surgery and conditions of patients at time of discharge are also available, as well as data on accidents.

Geographic Coverage

Provinces only. The completeness of coverage varies by province and by year.

Additional Information

Data on deaths in hospitals, secondary diagnosis, surgery and condition of patients at time of discharge, and accidents are not included in Statistics Canada publications.

Frequency and Time Span

Provincial data are available annually from 1960. Data for the Yukon and Northwest Territories are available for 1976 and 1977 only.

Size of File

Off-the-shelf: approximately 150 tabulations.
Special request: 25 to 55 variables (varies by province).

Mode of Dissemination

Computer printout; other specialized formats can be arranged.

Reference Materials

Research papers on selected topics such as therapeutic abortions, mental health and hospital morbidity are available upon request from the Institutional Care Statistics Section.

82.2 Tuberculosis Survey – Off-the-shelf and special request tabulations

Source

The data are derived from records of provincial tuberculosis case registries which make up the systems of tuberculosis control in the provinces and territories of Canada.

Universe

All new active or reactivated cases of tuberculosis in the Canadian population.

Subject Content

The reports on tuberculosis cases contain information on approximately 12 variables including socio-demographic status, residence, birthplace, detailed diagnosis, bacillary status, as well as some information on past treatment.

Geographic Coverage

Provinces and territories.

Additional Information

Since 1977 a set of about 20 unpublished tables, providing additional cross-classifications and a more detailed breakdown of the variables, are produced as a supplement to the annual report.

Additional cross-classifications tailored to user requirements can be provided.

Frequency and Time Span

Tuberculosis statistics have been compiled and published annually since 1936. The survey was revised several times over the years in response to changing patterns of tuberculosis incidence and treatment.

The text here describes the survey in recent years, i.e., 1976 to the current date.

Size of File

Special request-survey data are in machine-readable form since 1951 only. The file since 1976 contains notifications for approximately 18,000 new and reactivated cases of tuberculosis with details for about 12 data items for each case.

Off-the-shelf – 20 tabulations.

Mode of Dissemination

Data are available in the form of supplementary annual tables, on computer printout (1951 and onwards only) or as statistical summary tapes.

Related Publications

Statistics Canada. Health Division. *Tuberculosis Statistics: Morbidity and Mortality*. Annual. Bilingual. Cat. No. 82–212.

82.3

The National Cancer Incidence Reporting System – Off-the-shelf and special request tabulations

Source

A survey based on reports from provincial cancer registries which record all newly diagnosed cases of cancer in their registration areas.

Universe

The Canadian population, including residents of the Yukon and Northwest Territories. Ontario is included for the years 1969–71 only. Current data for Ontario are expected to become available in 1984.

Subject Content

For each newly diagnosed case of cancer, information on about 15 variables is collected including socio-demographic status, cancer site as well as histology of the cancer (since 1979 only), date and method of diagnosis and residence of the patient.

Geographic Coverage

Provinces and the territories. Ontario is excluded for all years except 1969–71.

Additional Information

Detail includes information on census division of residence as well as any cross-classification of variables

requested by the user. Statistics Canada publications contain geographic detail for province of residence only. One table produced annually shows the number of observed and expected cases of cancer (based on the incidence observed in all of Canada) by census division of residence. This table excludes British Columbia as well as Ontario.

Frequency and Time Span

Annual data, from 1969.

Size of File

Special request tabulations: approximately 50,000 events each year (excluding Ontario) with 15 variables describing each event.

Off-the-shelf: one tabulation.

Massaging of Data

The data may be made available in terms of crude and age-specific rates per 100,000 population and age-standardized rates per 100,000 population.

Mode of Dissemination

The Vital Disease Registries Section usually provides data on computer printout or in the form of summary tapes. The data are also available on the CANSIM Cross-Classified Module (matrix numbers 0050301 to 0050304).

Reference Materials

International Classification of Diseases, 8th Revision adapted for use in the United States, U.S. Department of Health, Education and Welfare, National Centre for Health Statistics. E. and F. This classification was used to classify diagnoses from 1969–1978.

International Classification of Diseases for Oncology (ICD-O), World Health Organization, Geneva, Switzerland, First Edition 1976. E. and F. This classification is used to code site and histology of cancers since 1979.

Related Publication

Statistics Canada. Health Division. *Cancer in Canada*. Annual. Bilingual. Cat. No. 82–207 (formerly called *New Primary Sites of Malignant Neoplasms*).

82.4

The Canadian Renal Failure Register – Special request tabulations

Source

A survey based on reports from all known renal failure centres in hospitals. This survey is a joint project of Statistics Canada, Health and Welfare Canada and the Kidney Foundation of Canada.

Universe

Patients with chronic renal failure who require dialysis or a kidney transplant. All patients who started treatment since January 1, 1981, are on the register.

Subject Content

For each of the patients with chronic renal failure who started treatment since January 1981, core information on socio-demographic status, primary diagnosis, treatment modality and outcome of treatment is available. In addition, each survey year a new set of supplementary questions is added to the questionnaire to permit in-depth study of selected topics.

Summary data on renal failure centre staff and facilities are also available.

Geographic Coverage

Provinces and territories.

Frequency and Time Span

Annual data, from 1981.

A previous renal failure register was operated at Statistics Canada from 1973–78. The contents of this survey differ from the survey described here. Selected tables for the period 1974–76 can be provided.

Size of File

Patient data: approximately 1,200 new patients were entered on the register in 1981. For each patient the register contains information on about 15 variables. In 1982, an estimated 1,200 new patients were added to the register and follow-up information on the patients registered the previous year will be recorded.

Facility data: for approximately 66 renal failure centres, information on 18 variables pertaining to staff and facilities are on file.

Massaging of Data

Percentage distributions, rates per 100,000 population and duration of treatment episodes can be calculated on request.

Mode of Dissemination

The data will usually be provided on computer printout.

Related Publications

Report on the Canadian Renal Failure Register, published by the Kidney Foundation of Canada. Annual. E. and F.

Various reports of the European Dialysis and Transplantation Association Register (EDTA), Pitman Books Ltd., London WC2B 9PB, U.K. E. and F.

82.5A**Canada Health Survey – Microdata****Source**

A sample survey conducted by Statistics Canada. Persons in households are the basic sampling units.

Universe

The non-institutionalized Canadian population, excluding residents of the territories, Indian reserves and remote areas as defined by the Canadian Labour Force Survey. In total, these exclusions comprise approximately three per cent of the entire Canadian population.

Subject Content

There are 352 variables including weighting factors available on the tape. Briefly, these variables measure risk factors – life style, biomedical and environmental variables; health status – physical and emotional health and health problem information; and health status consequences – medical care utilization and health problem impact. Extensive demographic and some household characteristic information is available. Some variable categories are not given to prevent residual disclosure.

Geographic Coverage

Only the codes for region of residence are given.

Frequency and Time Span

A one-time survey; the data are for July 1978 to March 1979.

Size of File

There are 31,668 records (some contain less than the 352 variables).

Mode of Dissemination

Tape only.

Reference Materials

Canada Health Survey Data Users' Guide. This guide has an overview of the survey and information on survey methods, the sample design, data limitations and the record layout.

In addition, a *TPL (Table Producing Language) Public Use File Codebook* and research reports on selected topics from the Canada Health Survey are available upon request.

It should be noted that multivariate analysis significance tests using the standard statistical packages generally available are not appropriate for this survey due to the complex sample design. However, special programs have been developed in Statistics Canada which will permit these tests to be made and they are available on request.

82.5B

Canada Health Survey – Special request tabulations

Source

A sample survey conducted by Statistics Canada. Persons in households are the basic sampling units.

Universe

The non-institutionalized Canadian population, excluding residents of the territories, Indian reserves and remote areas as defined by the Canadian Labour Force Survey. In total, these exclusions comprise approximately three per cent of the entire Canadian population.

Subject Content

There are 352 variables including weighting factors available for cross-classification. Briefly, these variables measure risk factors – life style, biomedical and environmental variables; health status – physical and emotional health and health problem information; and health status consequences – medical care utilization and health problem impact. Extensive demographic and some household characteristic information are available.

Geographic Coverage

All provinces, and health regions in Québec and Ontario only.

Additional Information

Only data weighted and rounded to thousands are released. The data are screened for high sampling errors before release (tabulation cells with sample sizes of 15 or less are suppressed; those cells with sample sizes between 16 and 49, inclusive, are flagged as a caution to indicate that they are subject to higher errors; cells with sample sizes of 50 or more are released without qualification).

Frequency and Time Span

A one-time survey; the data are for July 1978 to March 1979.

Size of File

Approximately 500 variables.

Massaging of Data

Some manipulations of the data are available on request.

Mode of Dissemination

The tabulations are usually made available on computer printout; however other specialized formats can be arranged.

Reference Materials

Research papers on selected topics from the Canada Health Survey are available on request.

Related Publication

82.6**Survey of Smoking Habits – Microdata****Source**

A supplementary survey to the Canadian Labour Force Survey (LFS) conducted by Statistics Canada.

Universe

The civilian non-institutionalized residents of Canada, 15 years of age and older, excluding residents of the Yukon, Northwest Territories and Indian reserves.

Subject Content

The survey on smoking habits supplies data on non-smokers, regular cigarette smokers and occasional cigarette smokers. Standard demographic variables are shown for each respondent 15 years of age and older.

Geographic Coverage

Provinces and major metropolitan areas: Victoria, Vancouver, Edmonton, Calgary, Saskatoon, Regina, Winnipeg, Toronto, Ottawa, Montréal, Québec, Halifax, St. John's.

Frequency and Time Span

Biennial data, from 1977.

Size of File

39,137 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology, and the guidelines for the release of data is supplied to users.

83**Hospitals and Health Manpower****83.1****Hospital Annual Statistics – Off-the-shelf and special request tabulations****Source**

A census conducted by Statistics Canada.

Universe

Approximately 1,300 public, private and federal hospitals providing general, rehabilitation, extended care (chronic) and speciality services are included.

Subject Content

Beds and patient-days by type of nursing unit, laboratory workload by units of work, cardiology examinations, diagnostic and therapeutic services by patient visits, ambulatory care services (clinics) are given. Other variables include personnel, paid hours of work, salaries, wages and other expenditures by department and occupational group, and a summary of educational programs. A summary of expenditures, assets, liabilities, equity and a statement of source and application of funds are included for public hospitals only.

Geographic Coverage

Provinces, census divisions, municipalities and postal code.

Frequency and Time Span

Annual data, from 1961.

Size of File

Special request: approximately 400 variables (2,000 data cells).

Off-the-shelf: approximately 275 tabulations.

Mode of Dissemination

Tape and computer printout.

Reference Materials

83.3**Registered Nurses Tabfile – Off-the-shelf and special request tabulations****Source**

Administrative records from provincial nursing associations.

Universe

All nurses who register with their provincial nursing association within the first four months of their annual licensing renewal period.

Subject Content

This file supplies the following data on nurses: province of registration, basic and post basic education in nursing, year of birth, sex, marital status, year and location of graduation in nursing, employment status, type of employer, average number of hours worked each week, type of position and place of residence including province, census division and census subdivision, and place of employment.

Geographic Coverage

Provinces, (employment/residence), census divisions and census subdivisions.

Frequency and Time Span

Annual data, from 1970.

Size of File

Off-the-shelf: 12 tabulations.
Special request: 14 variables.

Mode of Dissemination

Computer printout only.

83.4**Dental Hygienists Tabulations File – Off-the-shelf and special request tabulations****Source**

A sample survey of dental hygienists conducted by Statistics Canada.

Universe

All provincially licensed dental hygienists and members of the Canadian Dental Hygienists Association.

Subject Content

Data on dental hygienists include province of registration, year of birth, sex, marital status, basic education, Canadian school attended/country of graduation and year of graduation. In addition, data are provided on dependent children living at home, employment status, type of employer and hours worked each week. This file also has data on the percentage of time hygienists spend in their principal work activities, and the location of their residence and place of employment.

Geographic Coverage

Provinces (employment/residence), census divisions and census subdivisions.

Frequency and Time Span

Annual data, from 1975-78; biennial data, from 1979.

Size of File

Off-the-shelf: 11 tabulations.
Special request: 12 variables.

Mode of Dissemination

Computer printout only.

84**Vital Statistics****84.1****Vital Statistics: Births, Deaths and Marriages – Special request and off-the-shelf tabulations****Source**

Provincial offices of vital statistics (administrative records).

Universe

All resident Canadians.

Subject Content

Demographic characteristics such as age, sex, marital status, normal place of residence, rural/urban distribution, etc. For births, additional detail such as birth weight, birth order, period of gestation, etc; for deaths, very detailed causes of death are provided.

Geographic Coverage

Canada, provinces, counties or census divisions and local areas.

Additional Information

Local area data (published every five years) are available on an annual basis.

Frequency and Time Span

Annual, from 1921.

From 1921 to 1950: reduced detail, off-the-shelf tabulations only.

From 1950: full detail, special request and off-the-shelf tabulations available.

Size of File

Off-the-shelf: approximately 5,000 tabulations.
Special request: approximately 50 variables.

Massaging of Data

Analyses of the raw data and derivations of statistical measures provided on request.

Mode of Dissemination

Prior to 1950: tabulations printed from microfilm records.
From 1950: computer printout.

Reference Materials

86**Welfare Statistics****86.1****Survey of Child Care – Microdata****Source**

A supplementary survey (sample) to the Canadian Labour Force Survey (LFS) conducted by Statistics Canada.

Universe

The LFS survey sample is taken from the civilian non-institutionalized population of Canada, excluding residents of the Yukon, the Northwest Territories and Indian reserves. (See 71.1A for more complete definition.)

Subject Content

This file has detailed information on the type, quantity and cost of non-parental care received by preschool and school age children. Parents' reasons for choosing a particular type of care, their desire for change and their income range are also presented. Standard demographic and labour market variables are shown for each child, and for each responsible adult (usually the mother) and spouse.

Geographic Coverage

Provinces only.

Frequency and Time Span

A one-time survey, February 1981 data.

Size of File

19,962 records.

Mode of Dissemination

Tape only.

Reference Materials

87**Culture Statistics****87.1A****Performing Arts – Special request tabulations****Source**

A Statistics Canada sample survey and end-of-season Canada Council reports.

Universe

Professional non-profit performing arts companies that receive a proportion of their revenue from the federal or provincial or municipal governments.

Subject Content

The file has data on number and types of performances, attendance, length of season and weeks on tour. Data on earned revenue (revenue from single box office sales, subscriptions, guarantees and concession sales) and unearned revenue (government grants, and private contributions) are also available. Types of expenditures (personnel administration, publicity and promotion) and the surplus and deficit of companies at the beginning and the end of the fiscal year are provided.

Geographic Coverage

Canada, provinces and the larger census metropolitan areas (CMAs), including Montréal and Toronto.

Frequency and Time Span

Annual, from 1967 to 1980. (Note: The number of companies in the sample varies by year.)

Size of File

Approximately 40 variables.

Mode of Dissemination

Computer printout and typewritten copy.

Creative and Performing Artists – Off-the-shelf and special request tabulations

Source

A sample survey conducted by Statistics Canada.

Universe

A sample of individuals working as visual artists, writers, actors and directors in Canada. The data on visual artists residing in Québec and the Atlantic provinces are based on too few responses to be considered reliable for some breakdowns.

Subject Content

This file provides statistics for the following variables: education, professional training, income, media of production (visual artists), and work activities (writers, actors and directors) and employment patterns - full- or part-time. Cross-classification is by field of work, region of residence, age, sex, citizenship, language spoken and amount of professional experience.

Geographic Coverage

Regions (Atlantic provinces, Quebec, Ontario, Prairie provinces and British Columbia) and some provinces.

Additional Information

Variables not contained in Statistics Canada publications include breakdowns by province (when releaseable) media of production, medium of employment, attitudes toward conditions in the marketplace, citizenship and language.

Frequency and Time Span

Visual artists: quinquennial data, from 1977.

Writers: quinquennial data, from 1978.

Actors and directors: quinquennial data, from 1979.

Size of File

Off-the-shelf: 300 tabulations.

Special request: approximately 15 variables.

Mode of Dissemination

Computer printout and typewritten copies.

Reference Materials

Statistics on the Income of Visual Artists, Statistics on the Marketing of Art and Exhibitions and a questionnaire facsimile, all available from the Contact listed below.

Public Libraries – Special request tabulations

Source

A census of public libraries conducted by Statistics Canada.

Universe

All public libraries in Canada.

Subject Content

Public libraries by type and by population served and collections by type (book, periodical, microform and audio-visual materials) are available. Personnel by type, circulation, facilities, inter-library loans by origin and destination, income by source and expenditures by type are also available.

Geographic Coverage

Provinces, census metropolitan areas (CMAs) and municipalities.

Frequency and Time Span

Annual data, from 1972–73.

Size of File

Approximately 30 variables.

Massaging of Data

Special analysis is available upon request.

Mode of Dissemination

Tape and computer printout.

Reference Materials

A copy of the questionnaire is supplied upon request.

Related Publications

87.6**University and College Libraries – Special request tabulations****Source**

A census of university and college libraries conducted by Statistics Canada.

Universe

The libraries of the following postsecondary institutions: degree-granting institutions; affiliated, associated and federated colleges of degree-granting institutions; collèges d'enseignement général et professionnel (CEGEP) in Québec; private colleges in Québec; Colleges of Applied Arts and Technology (CAAT) of Ontario; private colleges in Alberta; community colleges; regional colleges; technical institutes; colleges of art and teachers' colleges.

Subject Content

Items include library facilities (size and seating), collections by type, personnel by type, audio-visual and microform holdings, enrolment by type, expenditures by type and inter-library loans by origin and destination.

Geographic Coverage

Provinces, regions, municipalities and institutions.

Frequency and Time Span

Annual data, 1972–73 to 1974–75; biennial data, from 1976 on.

Size of File

Approximately 70 variables.

Massaging of Data

Regression analysis is available upon request.

Mode of Dissemination

Tape and computer printout.

87.7**Survey of Fitness, Physical Recreation and Sport – Microdata, off-the-shelf and special request tabulations****Source**

A sample survey conducted by Statistics Canada, as a supplement to the Labour Force Survey.

Universe

The Canadian population 15 years and over. (See 71.1A for more complete definition.)

Subject Content

Data on participation in selected sports and in selected exercises include frequency of participation, facilities used and motivation. In addition, information on favourite sport, sport most interested in starting and participation in other leisure activities is given, Socio-economic data on individuals surveyed such as age, sex, relationship to household head, marital status, education, class of

worker, occupation, industry, labour force status and income are also provided.

Geographic Coverage

Canada, provinces, selected census metropolitan areas (CMAs) (the 10 largest) and CMA total/non-CMA total.

Frequency and Time Span

A one-time survey conducted in 1976.

Size of File

Microdata: 70,000 records.
Off-the-shelf: 50 tabulations.
Special request: 65 variables.

Massaging of Data

Services may be provided depending upon the complexity of the request.

Mode of Dissemination

Microdata: tape only.
Special request tabulations: tape and computer printout.
Off-the-shelf tabulations: computer printout only.

Reference Materials

The record layout for technical specifications (tapes only) and coefficient of variation tables are available upon request.

Publication 87–501 listed below contains a questionnaire facsimile and the survey methodology.

87.8**Travel to Work Survey – Microdata, off-the-shelf and special request tabulations****Source**

A sample survey conducted by Statistics Canada.

Universe

The Canadian employed population 15 years and over.

Subject Content

Data on commuters include method of transportation used; perceived availability and use of public transportation, and availability and use of automobiles. Data are also given for the distance to work, travel time

to work, size of automobile, number of persons in car, passenger/driver and model year of car. Cross-tabulation is available by age group, sex, occupation, industry, marital status, education and relationship to household head.

Geographic Coverage

Canada, provinces, the 10 large census metropolitan areas (CMAs) and CMA total/non-CMA total.

Frequency and Time Span

Annual data, from 1976.

Size of File

Microdata: 50,000 records.

Special request tabulations: approximately 60 variables.

Off-the-shelf tabulations: approximately 35 tabulations.

Massaging of Data

Services may be provided depending upon the complexity of the request.

Mode of Dissemination

Microdata: tape only.

Special request tabulations: tape and computer printout.

Off-the-shelf tabulations: computer printout only.

Reference Materials

Microdata: tapes contain complete documentation including a questionnaire facsimile, the record layout and coefficient of variation tables. Off-the-shelf and special request tabulations: coefficient of variation tables are available on request. Publication 87-503 listed below has the survey methodology and questionnaires.

Leisure Time Activities – Microdata, off-the-shelf and special request tabulations

Source

A sample survey conducted by Statistics Canada.

Universe

The universe includes Canadians 15 years of age and older.

Subject Content

Three subfiles are available: LTA1, LTA2 and LTA3, containing similar information. Data are given on the amount of time Canadians spend on leisure activities such as reading, listening to music, watching television and participating in sports. Statistics are also available on the number of times individuals visit cultural facilities such as museums, art galleries and libraries. The age, sex, marital status and income of each individual surveyed is also on file.

In addition, LTA3 has detailed information on reading habits. Items include types of books read, reasons for reading books and factors limiting book reading. Information is also available on the reading of newspapers and magazines.

Geographic Coverage

Provinces, regions and some census metropolitan areas.

Additional Information

None of the information in this file appears in Statistics Canada publications. However, some data are included in the Secretary of State publications listed below.

Frequency and Time Span

The data are triennial.

LTA1 – 1972, LTA2 – 1975, LTA3 – 1978.

Size of File

Microdata: LTA1 45,000 records; LTA2 30,000 records; LTA3 17,000 records.

Special request tabulations: approximately 100 to 200 variables for each subfile.

Off-the-shelf tabulations: approximately 150 tabulations in total.

Massaging of Data

Statistical analysis is available upon request.

Mode of Dissemination

Microdata: tape only.

Off-the-shelf and special request tabulations: computer printout only.

Reference Materials

Complete documentation is provided with the microdata tape including a questionnaire facsimile and the record layout.

Time Use Pilot Study – Microdata, off-the-shelf and special request tabulations

Source

A sample survey conducted by a private consultant for Statistics Canada, the Department of Communications and Employment and Immigration Canada.

Universe

The Canadian population 15 years of age and over.

Subject Content

This file contains detailed information on the daily activities of a non-random sample of Canadians 15 years of age and over.

Geographic Coverage

Twelve urban areas: Vancouver, Calgary, Regina, Toronto, Sudbury, Montréal, Sherbrooke, Charlottetown, St. John's, Saint John, Halifax and Ottawa. Three rural areas: the Brome Census Division in Quebec, King's Census Division in Prince Edward Island and Census Division No. 18 in Manitoba.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

A one-time survey conducted in 1981. A full-scale national survey is planned for 1984-85.

Size of File

Microdata: 2,700 records.
Off-the-shelf: approximately 40 tabulations.
Special request: approximately 90 variables.

Massaging of Data

A variety of services, including statistical analysis, are available upon request.

Mode of Dissemination

Microdata: tape only.
Off-the-shelf and special request tabulations: computer printout only.

Reference Materials

Complete documentation is provided with the microdata tape, including a questionnaire facsimile and the record layout.

Canadian Travel Survey – Microdata, off-the-shelf and special request tabulations

Source

A sample survey conducted by Statistics Canada, as a supplement to the Labour Force Survey.

Universe

The Canadian population 15 years of age and over. (See 71.1A for more complete definition.)

Subject Content

Travel data include main method of transportation, main reason for travel, trip distance, trip duration, accommodation used, origin and destination, type of travel expenditures and, for 1982 only, activities of travellers and National Park use. Socio-economic data such as age group, education, household income, occupation, sex, marital status, labour force status and industry groups are also given.

Geographic Coverage

Canada, provinces (origin and destination), selected census metropolitan areas (the 10 largest), tourism regions (destination only) and 1971 Census economic regions (origin and destination).

Frequency and Time Span

Data are available for the 3rd and 4th quarters of 1978; for each quarter of 1979, 1980 and 1982; and for the 1st and 3rd of 1981. No survey data will be collected in 1983.

Size of File

Microdata: varies from 8,000 to 25,000 records.
 Off-the-shelf: varies from 25 to 40 tabulations each quarter.
 Special request: approximately 30 variables.

Massaging of Data

Services may be provided depending on the complexity of the request.

Mode of Dissemination

Microdata: tape only.
 Off-the-shelf tabulations: computer printout only.
 Special request tabulations: tape and computer printout.

Reference Materials

The record layout (for tapes only), survey methodology and crude coefficients of variance tables are available upon request.

91.2 Population Estimates – Off-the-shelf tabulations

Source

Statistics Canada Censuses of Population and Housing and Health and Welfare Canada administrative records.

Universe

Canadian population.

Subject Content

Population by sex and single year of age on June 1, 1921 to 1970.

Population by single year of age, sex and marital status, by census years 1971 to 1982.

Children and families receiving Family Allowance, monthly, quarterly and calendar year 1951 to 1982.

Geographic Coverage

Canada, provinces and territories.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

See subject content.

Size of File

Population by sex and single year of age, June 1, 1921 to 1970:

1921–1950: three tables, 15 pages per year.

1951–1960: three tables, nine pages per year.

1961–1970: three tables, 15 pages per year.

Population by single year of age, sex and marital status, by census years 1971 to 1982:

1971–1976: one table, 234 pages.

1977–1981: one table, 195 pages.

1982: one table, 39 pages.

Children and families receiving Family Allowance: monthly, quarterly and calendar year 1951 to 1982, 384 pages.

Mode of Dissemination

Printout and tape:

Population by sex and single years of age.

Population by single years of age, sex and marital status.

Other data are typed from 1951 to 1976 and on printout and tape from 1976 to date.

CANSIM: Quarterly data for Canada and the provinces, matrix number 000001.

Annual data for Canada and the provinces, matrix number 000060.

Annual data for Canada and the provinces by five-year age groups and sex, matrix numbers 006968 – 006980.

91.12**Experimental Estimates of Migration From Individual Income Tax Records – Special request tabulations****Source**

Federal government administrative records.

Universe

All persons filing individual income tax returns (approximately 80% of the adult population 16 years of age and over). A model is used to impute the dependents of taxfilers and to weight the data for the population not covered by the tax system. Therefore, the migration data are estimates for the total population.

Subject Contact

The estimates show migration flows between the 265 census divisions and international migration to and from these divisions. The estimates are by major age group (less than 16, 16–24, 25–44, 45–64, 65 and over) and sex. The geographic coding of the tax records is on the basis of postal code that forms part of the mailing address. The data have been summarized in a number of standard tables as follows: (a) total in, out and net migration; (b) total in, out and net migration by age group; (c) total in, out and net migration by type (intraprovincial, interprovincial, international); and (d) major migration flows (gross flows greater than 50) by origin/destination – ranked by gross migration, net gain and net loss.

Geographic Coverage

Census divisions only.

Frequency and Time Span

The data are produced on an annual basis. Currently, data are available for the years 1975–76 to 1980–81. The annual data reflect migration for approximately the 12-month period (April to April) between successive income tax returns.

Size of File

The matrix of migration flows contains approximately 30,000 flows between census divisions.

Mode of Dissemination

Selected tabulations are available on computer printout and data can also be made available on tape.

Reference Materials

Technical Report on the Development of Migration Data from Taxation Records available upon request from the Administrative Data Development Division.

91.15**The Current Population Profile – Microdata****Source**

A supplementary sample survey to the Canadian Labour Force Survey (LFS) conducted by Statistics Canada.

Universe

The universe is the population of British Columbia and Alberta 15 years of age or older, excluding inmates of institutions, full-time members of the armed forces and residents of Indian reserves.

Subject Content

For all respondents, data are presented on mother tongue, language spoken in the home, official language usage and attendance at university and/or community college. For persons who had ever lived in another province, data are given on when and from which province they last moved, the reason they moved, their educational attainment prior to their most recent move and their labour force activity the month before and after the most recent move (for moves after June 1, 1976 only). The industry, occupation and usual hours of last and first job held before and after the most recent move are also included.

Geographic Coverage

British Columbia and Alberta.

Frequency and Time Span

A one-time survey, December 1980 data.

Size of File

22,000 records.

Mode of Dissemination

Tape only.

Reference Materials

A microdata documentation package outlining the survey objectives and methodology, and the guidelines for the release of the data are supplied to users.

92 Population

92.1

Census of Population and Housing – Special request tabulations

Source

Censuses of Population – June 3, 1981; June 1, 1976; June 1, 1971.

Universe

The universe includes 100% coverage of Canadian households and population for a series of basic demographic and housing characteristics and, in 1971 and 1976, a 33 1/3% sample of Canadian households and population for a series of more detailed demographic, cultural, economic and housing characteristics; in 1981 this sample was reduced to 20%.

Subject Content

The data base contains all variables collected in the three censuses and numerous derived variables. Cross-tabulations may be produced of any of the variables with any other, whether one is counting people, families or households or dwellings. The restrictions are reliability of the data, confidentiality and the cost of production. Variables range from basic demographic variables such

as age, sex and marital status to cultural and economic variables such as income, occupation, education and ethnic origin.

Geographic Coverage

Tables may be produced on all standard census geographic levels from the enumeration area up to the national level. Tables may also be produced on "non-standard" geographic areas. These "non-standard" areas are defined by the client and can be created by the addition or subtraction of standard areas or by a polygon (a shape) drawn on a map or by a specific geometric shape around a point or a line (circles, squares, rectangles, etc.).

Frequency and Time Span

The census is taken every five years, on the years ending with a one or a six. The censuses taken on the one years (e.g. '61, '71, '81) have included more questions than those on the six years (e.g. '56, '66, '76). These differentiations may change as society's need for data expands. Only the 1971, 1976 and 1981 data bases are accessible for special tabulations.

Size of File

The 1971 file contains some 145 variables, the 1976 file – 55 and the 1981 file – 224. Each of these files contains in excess of 20,000,000 separate records.

Mode of Dissemination

The majority of tables are produced in printout form. Also produced are machine-readable files in matrix form which can be manipulated, machine-readable files which are an image of the printed page and may be printed on user installation, and microfiche in the standard COM (computer output microfiche) mode with 267 data pages per fiche.

Related Publications

The censuses have produced some hundreds of tabulations for thousands of geographic areas in a regular publication program. In addition, a large series of tables are produced in machine-readable form and on microfilm or microfiche. For further information on publications see the *Historical Catalogue of Statistics Canada Publications, 1918–1980*, various issues of the *Statistics Canada Catalogue* from 1973 and *Products and Services of the 1981 Census of Canada*. For census information in machine-readable form and on microfiche and microfilm see other entries in section 92 of this directory.

1971 and 1976 Census Public Use Sample Tape Files – Microdata

Source

One per cent samples from 1971 and 1976 Censuses of Population and Housing.

Universe

All households in Canada.

Subject Content

Three separate files (Individuals, Households and Families) are available from each census.

1971 Census: Major variables include individuals – age, birthplace, number of children, country of citizenship, ethnic or cultural group, family membership, marital status, migration status, mother tongue, official language, religion, level of schooling, sex, class of worker, hours worked, weeks worked, income, major source of income, labour force status, industry, occupation; households – type, number of persons, number of lodgers, automobiles, bath facilities, monthly rent, cooking fuel, garage, heating equipment, heating fuel, sewage disposal, mortgage, number of rooms, period of construction, tenure, type of dwelling, vacation home, water supply; families – number of children, family status, inter-municipal moves, language of the home, migration status, number of persons, period of immigration, place of residence (1966 and 1971), major source of income.

1976 Census: Major variables include individuals – age, educational qualification, labour force activity, level of schooling, marital status, mobility status, mother tongue, school attendance, sex; households – status, classification, number of persons, tenure of dwelling, population size group, structural type, type of dwelling; families – status, structure, type, number of children, number of persons.

Geographic Coverage

1971 Census: nine provinces (Prince Edward Island and territories excluded) with identification of urban/rural distribution; Montréal and Toronto census metropolitan areas (CMA) individually identified by separate samples.

1976 Census: nine provinces (Prince Edward Island and territories excluded) with identification of urban/rural distribution and Montréal, Toronto and Vancouver CMAs.

Frequency and Time Span

1971 and 1976 censuses currently available; 1981 sample tapes to be offered in 1984.

Size of File

1971 Census: Individual File – 51 variables.
Household File – 53 variables.
Family File – 62 variables.
Total number of records – approximately 400,000.

1976 Census: Individual File – 26 variables.

Household File – 21 variables.

Family File – 22 variables.

Total number of records – approximately 350,000.

Mode of Dissemination

Magnetic tape only.

Reference Materials

Complete technical documentation is supplied with purchase of tapes.

Non-technical descriptions, available without charge, are: *Introduction to the Public Use Sample Tapes, 1971* and *Introduction to the 1976 Census Public Use Sample Tape Files*.

Related Publications

Publications of the 1971 and 1976 censuses are listed and described briefly in the *Historical Catalogue of Statistics Canada Publications, 1918–1980* or in various issues of the *Statistics Canada Catalogue* from 1973 to 1983.

Public use sample tapes may also be ordered through regional reference centres of Statistics Canada (see listings in the Introduction) or through provincial statistical focal points.

92.3

1981 Census User Summary Tape Files – Off-the-shelf and special request tabulations

Source

1981 Census of Population and Housing.

Universe

All households in Canada.

Subject Content

2A (short form): detailed breakdown of variables including age, sex, family status, family structure and type, marital status, mother tongue, census families, children at home, household type, structural type and tenure of dwellings.

2B (long form): detailed breakdown of variables including population – age, ethnic origin, education, level of schooling, home language, income, industry, labour force activity, official language, marital status, migration status, mobility status, mother tongue, occupation, period of

immigration, place of birth, place of residence, place of work, religion, school attendance, weeks worked, work activity; dwellings – condition, heating equipment, number of bathrooms, period of construction, principal fuels, dwelling characteristics, structural type, tenure, value, number of rooms; households – gross rent, length of occupancy, number of persons, household characteristics, type; families – family structure, number of children, family income.

Geographic Coverage

Most variables are available by enumeration area, census subdivision, census tract and provincial census tract, census agglomeration, census division, census metropolitan area, federal electoral district and census tracted centre.

Additional Information

Tabulations of variables at the enumeration area level and many others do not appear in Statistics Canada publications. Custom tabulations to user specifications at an aggregate level are available from the tapes.

Frequency and Time Span

1981 Census only.

Size of File

177 files containing a total of 542 tables.

Mode of Dissemination

Magnetic tape, microfiche, computer printout.

Reference Materials

1981 Census User Summary Tapes, Content of Tables – 2A. and 1981 Census User Summary Tapes, Content of Tables – 2B.

Related Publications

92.5

1971 Census User Summary Tape Files – Off-the-shelf and special request tabulations

Source

1971 Census of Population and Housing.

Universe

All households in Canada.

Subject Content

2A (short form): detailed breakdown of variables including age, sex, marital status, mother tongue, families, households, persons, lodgers, children, dwellings, tenure, type of dwelling, rooms in dwellings, water supply, bath facilities, toilet facilities, persons per room.

2B (long form): detailed breakdown of variables including population – age, birthplace, citizenship, ethnic origin, religion, language, level of schooling, school attendance, university degree, vocational training, income, labour force status, industry, class of worker, occupation, migration status, marital status; families – family income, income recipients, occupation of head, schooling of head; housing – tenure, period of construction, number of rooms, water supply, sewage disposal, heating equipment, heating fuel, cooking fuel, automobiles, vacation homes, appliances, type of dwelling; households – income of head, type of household, cash rent, non-family households.

Geographic Coverage

Most variables are available by enumeration area, census tract/area aggregate, municipalities of 5,000 persons and over, census metropolitan area, census agglomeration, and other geographic entities below the province level.

Additional Information

Tabulations at the enumeration area level and many others do not appear in Statistics Canada publications. Custom tabulations to user specifications at an aggregate level are available from the tapes.

Frequency and Time Span

1971 Census only.

Size of File

82 files containing a total of 481 tables.

Mode of Dissemination

Magnetic tape, microfilm, computer printout.

Reference Materials

1971 User Summary Tapes – manual giving description of tables, technical and other information.

Related Publications

Publications of the 1971 Census are listed and described briefly in the *Historical Catalogue of Statistics Canada Publications, 1918–1980* or in various issues of the annual *Statistics Canada Catalogue* from 1973 to 1982.

Agriculture

96.1

Census of Agriculture User Summary Tape Files – Off-the-shelf tabulations

Source

The 1971, 1976 and 1981 Censuses of Agriculture conducted by Statistics Canada.

Universe

Census farms. Refer to published reports of the various censuses of agriculture for a definition of census farm applying in a particular census.

Subject Content

Variables include number, type, size and tenure of farms, grains planted and harvested, fruit trees, vegetables, improved and unimproved land, woodland, pasture, areas fertilized by crop, irrigated areas, cattle by type, milk produced, other animals, automobiles, trucks, tractors, grain combines, swathers, hay balers, milking machines, hired labour, age of operator, type of organization, cash wages, taxes, cash rent, sales, days worked off-farm etc.

Geographic Coverage

Census consolidated subdivision, census division, agricultural region (1981 only) and province. Agricultural regions are defined by each province and are usually census divisions or groups of census divisions. The census consolidated subdivision is explained and listed in the *Standard Geographical Classification, Vol. II* (see under reference materials listed below).

Additional Information

Data at the census consolidated subdivision level does not appear in Statistics Canada publications.

Frequency and Time Span

1971, 1976 and 1981 Censuses of Agriculture.

Size of File

1971 – 45 tables.

1976 – 30 tables.

1981 – 70 tables.

Mode of Dissemination

Tape, microfiche (microfilm for 1971) and computer printout.

Reference Materials

Complete documentation is supplied on request and with each tape purchased (see contact below).

Statistics Canada. Standards Division. *Standard Geographical Classification, Volume II, The Index, 1981*. Occasional. Bilingual. Cat. No. 12–568.

Related Publications

Publications of the 1971 and 1976 Censuses of Agriculture are listed and described briefly in the *Historical Catalogue of Publications, 1918–1980* and various issues of the *Statistics Canada Catalogue* from 1973 to 1983. A partial listing of publications of the 1981 Census of Agriculture appear in the 1983 issue of the *Statistics Canada Catalogue*.

96.2

Census of Agriculture – Special request tabulations

Source

1971, 1976, 1981 Censuses of Agriculture conducted by Statistics Canada.

Universe

Census farms. Refer to published reports of the various censuses of agriculture for a definition of census farm applying in a particular census.

Subject Content

All variables released in the three censuses are available. See listing of variables in 96.1 (Census of Agriculture Summary Tape Files). In addition, in 1971 and 1981 only, the agriculture and population data bases have been linked to permit the tabulation of population variables related to census farms and farm operator households.

Geographic Coverage

Enumeration area, electoral district, census consolidated subdivision, census division, agricultural region, province and any aggregation of the above specified by the user. Agricultural regions are defined by each province and are

usually census divisions or groups of census divisions. The census consolidated subdivision is explained and listed in the *Standard Geographical Classification, Vol. II* (see under reference materials listed below).

Complete documentation is supplied on request and with each tape purchased (see contact below).

Frequency and Time Span

1971, 1976 and 1981 Censuses of Agriculture.

Size of File

1971 – 327 variables for 366,128 census farms.

1976 – 148 variables for 338,578 census farms.

1981 – 278 variables for 318,361 census farms.

Massaging of Data

As specified by the user.

Mode of Dissemination

Tape and computer printout.

Reference Materials

Complete documentation is supplied on request and with each tape purchased (see contact below).

Statistics Canada. Standards Division. *Standard Geographical Classification, Volume II, The Index, 1981*. Occasional. Bilingual. Cat. No. 12–568.

96.3

Census of Agriculture Match – Off-the-shelf tabulations

Source

The quinquennial and decennial Censuses of Agriculture conducted by Statistics Canada.

Universe

Agricultural holdings enumerated by these censuses.

Subject Content

Data are given on the number of census farm operators who started farming, and those who stopped, between

1966 and 1976. Cross-classification is by province, age, size of gross farm sales, type of farm, size of total capital value and number of days of off-farm work.

Geographic Coverage

Canada and provinces.

Additional Information

None of the information in this file appears in Statistics Canada publications.

Frequency and Time Span

Quinquennial and decennial census data, from 1966.

Size of File

50 tabulations.

Mode of Dissemination

Photocopies only.

Appendix to Chapter 9

Census Spatial Reference Products Available from CANSIM

The following geography tape files are available:

The “Enumeration Area Conversion File, 1976–1981” lists “geographically equivalent” 1976 and 1981 Census of Canada enumeration areas (EAs) by province and has been prepared to aid users in the comparison of 1976 and 1981 Census data at the EA level. An “Enumeration Area Conversion File, 1971–1976” is also available.

The 1981 “Geography Tape File” assigns each collection unit (namely enumeration areas) to all higher geographic levels by code and name for Canada. It includes EA centroids (in Universal Transverse Mercator, Lambert,

latitude and longitude co-ordinates), the standard geographical codes, the population and household counts. Also available for 1971 and 1976 censuses.

The “Land Area Files” including 1976 and 1981 population are available at the following geographic levels: census subdivision (CSD), census division (CD), census tract (CT), and provincial census tract (PCT). Land area refers to area measurement in square kilometres and excludes, whenever feasible, large bodies of water. Also available for 1976 with 1971 and 1976 population data.

The 1981 “Place Name Master File” lists census division, census subdivisions and all unincorporated places for which 1981 population was reported. Information given includes Standard Geographical Classification codes, census codes, type of place, location in latitude and longitude, census map number and population. For unincorporated places, a breakdown of population by enumeration areas is also given. Also available for the 1976 Census.

The “CARTLIB Files” are digital cartographic libraries of the boundaries and related features of various geostatistical areas, stored on magnetic tape for use by computer mapping programs.

A CARTLIB file for 1981 is available at the census tract (CT) level for 12 census metropolitan areas (CMAs): Calgary, Edmonton, Halifax, Hamilton, Montréal, Ottawa-Hull, Québec, Regina, St. John’s, Toronto, Vancouver and Winnipeg. One type of tape file defines the boundaries of these areas, and another acts as an index for the boundary files and lists additional information for each area, such as land area, population, geographic codes, names, and centroids. The index file is included with the boundaries, or can be purchased separately. Similar files are available for the 1971 and 1976 censuses.

A CARTLIB file is available at the census division (CD) level (including counties, regional municipalities, regional districts, etc.). The file contains the boundaries of the 266 CDs, as well as the provincial and territorial boundaries.

A CARTLIB file will be available at the federal electoral district (FED) level, based on the 1976 Representation Order. The file contains the boundaries of the 282 FEDs, as well as the provincial and territorial boundaries.

The 1981 “Area Master Files” (AMFs) contain a logical representation of all city streets and other selected features (such as railroad tracks, rivers, and municipal boundaries) in machine-readable form. The AMFs geographically reference every street, address range, block-face and centroid co-ordinate in the coverage area. An AMF is available for most centres with a population of 20,000 or more. Also available for 1971 and 1976 censuses.

The 1981 "Street Index File" links address ranges to enumeration areas for large urban centres. The file includes street name, type, direction and odd and even address ranges, as well as Standard Geographical Classification codes. Also available for 1971 and 1976 censuses.

The "Postal Code Conversion File" links the postal code to the Standard Geographical Classification code for selected urban centres.

All of the above products may be ordered through regional reference centres of Statistics Canada (see listings in the Introduction), through provincial statistical focal points or directly from:
